The Art of Composition Chronicle Books (CA)

* The book that launched a renaissance in

climbing technique and remains relevant today * Techniques and mental skills needed to climb at a more challenging level * Illustrated with full-color photos throughout Big, high routes at the edge of a climber's ability are not the places for inventing technique or relying on old habits. Complacency can lead to fatal errors. So where does the hard-core aspirant or dreamer turn? The only master class in print, *Extreme Alpinism* delivers an expert dose of reality and practical techniques for advanced climbers. Focusing on how top alpine climbers approach the world's most difficult routes, Twight centers his instruction on the ethos of climbing the hardest routes with the least amount of gear and the most speed. Throughout, Twight makes it clear that the two things he refuses to compromise are safety and his climbing ethics. In addition to the extensive chapters on advanced techniques and skills, Twight also discusses mental preparedness and attitude; strength and cardiovascular training; good nutrition; and tips on equipment and clothing.

Leica makes the world's premiere luxury rangefinder camera system--and here's the definitive guide to using the magnificent Leica M8/M8.2 digital cameras, as well as a 32 page full-cover insert covering the brand-new full-frame Leica M9 and the 18mm Elmar-M lens. It's written specifically for the many Leica photographers who want to take full advantage of a digital Leica's potential and produce the very best pictures possible. As a rangefinder digital camera, the M8 offers unique advantages, but it also presents specific challenges, which author and Leica expert Brian Bower addresses at length and in depth, enhanced by his own gorgeous Leica photography. He discusses digital controls, lenses, and accessories; close-up techniques and flash photography; and

options for firmware, software, and hardware.

8 1/2 x 10 Since publication this title has proved to be very popular for both the serious lens user wishing to understand more about his lenses, as well as the Leica enthusiast considering which lens would be suitable to add to his outfit. Do you know your "Coma from your Aberrations"? If "Yes," then part 2 of

Erwin Puts' new book will be of considerable interest to you. Either way you may find this section easier to understand than you expect; the illustrations and diagrams do help. Part 1 goes into the optical history of E. Leitz, Wetzlar and the Leica Camera of Solms in detail with all the personalities involved. This section is well illustrated with some new pictures. The commercial demands are always battling with the perfectionists at Leica who created some of the world's most famous lenses. Part 2 is an optical digression explaining the lens and glass design features, problems and terms and the continual battle to ensure that Leica users end up with the highest possible standard of lens. Part 3 is the largest part of the book. Puts has tested Leica lenses from 1925 to date; each lens, in most cases with diagram, is detailed with its performances at the critical apertures.

There is a lot more to photography than simply picking up a camera, pointing it toward something, and tripping the shutter. Achieving a great photograph requires thought and preparation, an understanding of the photographic process, and a firm grasp of how light and composition affect a photo. There must be personal involvement and personal expression. There must be experimentation, with the recognition that only a small percentage of experiments end successfully. In this book, best-selling author and world-renowned photographer and teacher Bruce Barnbaum explores these seldom-discussed issues by drawing upon his personal experiences and observations from more than 40 years of photographing and teaching. In addition to photographs, Bruce also uses painting, music, and writing, as well as the sciences and even business, to provide pertinent examples of creative thinking. These examples serve as stepping-stones that will lead you to your own heightened ability to see and be creative. Creativity is a topic that is almost wholly ignored in formal education because most instructors think that it cannot be taught or learned. To the contrary, Bruce

has proven that photographic seeing and creativity can be taught, learned, and improved. This book expands on the ideas that are central to Bruce's method of teaching photography, which he has used in workshops for the past 41 years. Included in the book are in-depth discussions on the following topics: Defining your own unique rhythm and approach as a photographer How to translate the scene in front of you to the final photograph The differences and similarities between how an amateur and a professional approach photography The differences between realism and abstraction, and the possibilities and limitations of each Learning to expand your own seeing and creativity through classes, workshops, and associating with other photographers Why the rules of composition should be ignored How to follow your passion When to listen to the critics and when to ignore them The book is richly illustrated with over 90 photographs taken by Bruce as well as other photographers. Seeing and creativity are difficult to teach, but not impossible. This very different, perhaps groundbreaking book is sure to inspire photographers of all skill levels—from beginners to seasoned professionals—to think deeply about the issues involved in creating successful photographs.

Extreme Alpinism Bulfinch Press

In this series, Aperture Foundation works with the world's top photographers to distill their creative approaches, teachings, and insights on photography—offering the workshop experience in a book. Our goal is to inspire photographers of all levels who wish to improve their work, as well as readers interested in deepening their understanding of the art of photography. Each volume is introduced by a well-known student of the featured photographer. In this book, internationally acclaimed color photographers Alex Webb and Rebecca Norris Webb, offer their expert insight into street photography and the poetic image. Through words and photographs—their own and others'—they invite the reader into the heart of their artistic processes. They share their thoughts about a wide range of practical and philosophical

issues, from questions about seeing and being in the world with a camera, to how to shape a complete body of work in a way that's both structured and intuitive.

More relevant than ever, this seminal collection of essays encourages us to believe in the power of ordinary citizens to change the world In today's turbulent world it's hard not to feel like we're going backwards; after decades of striving, justice and equality still seem like far off goals. What keeps us going when times get tough? How have the leaders and unsung heroes of world-changing political movements persevered in the face of cynicism, fear, and seemingly overwhelming odds? In *The Impossible Will Take a Little While*, they answer these questions in their own words, creating a conversation among some of the most visionary and eloquent voices of our times. Today, more than ever, we need their words and their wisdom. In this revised edition, Paul Rogat Loeb has comprehensively updated this classic work on what it's like to go up against Goliath --

whether South African apartheid, Mississippi segregation, Middle East dictatorships, or the corporations driving global climate change. Without sugarcoating the obstacles, these stories inspire hope to keep moving forward. Think of this book as a conversation among some of the most visionary and eloquent voices of our times -- or any time: Contributors include Maya Angelou, Diane Ackerman, Marian Wright Edelman, Wael Ghonim, Váav Havel, Paul Hawken, Seamus Heaney, Jonathan Kozol, Tony Kushner, Audre Lorde, Nelson Mandela, Bill McKibben, Bill Moyers, Pablo Neruda, Mary Pipher, Arundhati Roy, Dan Savage, Desmond Tutu, Alice Walker, Cornel West, Terry Tempest Williams, and Howard Zinn.
