This is a book on the life and times of Robert Chambers, founder of W. & R. Chambers publishers. Although there are now books based on some of his

letters and on the impact of one of his books, *The Vestiges of Natural Creation*, there are no books on the whole man and his life. Written by Iris Macfarlane with Alan Macfarlane, the book weaves together three strands. At one level, it is a biography of Chambers and his family; the portrait of a rise from absolute poverty to great wealth and influence. At the second it provides the context of his life by the way of a portrait of nineteenth century Edinburgh as seen through his eyes. At the third it explores the intellectual and organisational revolutions embodied in his life, the explorations in history, folklore, geology, publishing, education and many other fields which made him one of the most exciting thinkers of his age. It is based on extensive archival research among the Chambers' archives in Edinburgh and conversations with his descendants. Please note: This title is co-published with Social Science Press, New Delhi. Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.
