This book focuses on the use of molecular tools to study small populations of rare and endangered mammals, and presents case studies that apply an evolutionary framework to address innovative questions in the emerging field of mammalian conservation

genomics using a highly diverse set of novel molecular tools. Novel and more precise molecular technologies now allow experts in the field of mammology to interpret data in a more contextual and empirical fashion and to better describe the evolutionary and ecological processes that are responsible for the patterns they observe. The book also demonstrates how recent advances in genetic/genomic technologies have been applied to assess the impact of environmental/anthropogenic changes on the health of small populations of mammals. It examines a range of issues in the field of mammalian conservation genomics, such as the role that the genetic diversity of the immune system plays in disease protection and

local adaptation; the use of noninvasive techniques and genomic banks as a resource for monitoring and restoring populations; the structuring of population by physical barriers; and genetic diversity. Further, by integrating research from a variety of areas – including population genetics, molecular ecology, systematics, and evolutionary and conservation biology – it enables readers to gain a deeper understanding of the conservation biology of mammals that are at increasing risk of extinction at local, regional and global scales. As such, it offers a unique resource for a broad readership interested in the conservation biology of mammals and conservation management strategies to better preserve

biodiversity.

Water Consciousness Boynton/Cook

A dangerous prophecy threatens Edwardian London... and it begins with a murder. Lily Albright can see the future, and it looks like hell. In an England on the brink of war, Lily is plagued by psychic visions of the cataclysmic destruction of London. An ancient prophecy is coming to fruition, and it starts with the gruesome discovery of a corpse in the sewers. To save her city, Lily must untangle a web of conspiracy and violence. She'll need the help of all of her fellow Charismatics—the men and women who know "the impossible things". That includes the enigmatic Lord Strangford, whose ability to see into the darkest corners of Lily's soul threatens to tear their relationship apart. From the gutters of the Limehouse to the champagne-soaked ballrooms of St. John's Wood, Lily races to expose a plot that could bring the British empire to its knees. But changing fate and preventing an apocalypse will put Lily's charismatic powers to the ultimate test. Jacquelyn Benson continues The London Charismatics with another supernatural historical fantasy full of gothic mystery and

occult powers. Pick up The Shadow of Water and return to the arcane streets of Edwardian England.

Quicksand Houghton Mifflin Harcourt Clifford Allyn Abernathy III (just Cliff, for short) is the oldest of six kids in a family that does everything—fighting, laughing, playing, eating, telling stories, and celebrating the holidays—in a big, often outlandish, and sometimes poignant way. Taking the family from Christmas to Christmas, the chapters of Fig Pudding, narrated by eleven-year-old Cliff, are complete short stories in themselves. Read together, they tell the tale of life in a large, loving family. Besides a fresh look, this edition includes a brand new story.

Also Known as Rowan Pohl Springer Nature In To Live Is Christ, best-selling author Beth Moore travels on a spiritual odyssey through the life of one of Christianity's most fervent journeymen, the apostle Paul, tracing his story from childhood to martyrdom. Proclaiming his faith as a benchmark in New Testament Scripture, Beth writes, "I have accepted many of Paul's words as a personal challenge. 'I want to know Christ' has become my plea. 'To live is Christ and to die is gain' has become my hope. And to borrow his words once more, 'Not that I have already obtained all this . . . but I press on.'" Paul's undying passion for Christ continues to inspire and challenge those with a deep spiritual

hunger for the things of God. Readers will be greatly refreshed by the obvious mercy of God that causes those who have failed him to repent and serve him wholeheartedly and effectively.

Taxa Alternet Books
Beloved #1 New York Times
bestselling author Debbie Macomber
shares inspirational and
empowering true stories of what
happens when we commit intentional
acts of generosity. Master
storyteller Debbie Macomber knows
a secret. In a world that seems
too often reticent and begrudging,
Debbie has learned firsthand that
living in a spirit of generosity
yields unforeseen miracles. Lives
can be changed in ways we never
envisioned. Just as a young boy
volunteered his fishes and loaves
to Jesus in Galilee and saw his
meager gift multiplied many times
over to feed five thousand, we can
live open-handed and stand amazed
at what God accomplishes through
simple acts of generosity. This
moving blend of true stories and
motivating messages delights and
surprises us as we see for
ourselves that giving the gifts of
time, encouragement, hope,
laughter, prayer, hospitality,
service, and forgiveness often
have a life-changing impact, not
only on the recipient of such
gifts, but on the giver as well.

All it takes is one simple act.
Macomber, through her masterful
power of storytelling, calls us to
live with an open heart, offering
who we are and what we have to
God, to use in the lives of
others. When we do so with an
eager sense of expectancy,
lives—including our own—are
changed in ways we couldn't have
imagined.

"You can print from an iPhone®. It's the dumbest thing." - Bo Fahs, writer and host of Tele-Friends From the moment we began to digitize our world, we created machines that worked tirelessly to pull all that information zooming around back to the physical world. Enter: the home printer. Perhaps as payback for forming a nonsensical dichotomy, these printers couldn't just work. Not without a fight, at least. No. They insisted on screeching at plane-like decibels, plopping out pages at an excruciatingly slow pace, streaking only the most important documents, and running out of ink when you

cartridge. From the first consumer inkjet to more modern monstrosities, Sh*tty Printers breaks down the worst offenders of our home offices. Featuring popular and exasperating home staples such as: • The HP Thinkjet 2225A • The Lexmark Z22 • The long forgotten Canon BJC-85 • and many more Each printer is beautifully photographed and ruthlessly torn to shreds as their individual strengths, weaknesses, and charisma are scored on sliding scales born from relatable frustration. *Canon EOS Rebel T1i/500D* Genealogical Publishing Com The most advanced entry-level digital SLR camera that Canon has ever introduced. Ubiquitous Information

Technologies and Applications

Houghton Mifflin Harcourt

One of the great enigmas of evolutionary biology has been how to treat animals of problematic systematic position. Many are known only as fossils, so this area has been of particular interest to palaeobiologists. This book represents a wide synthesis. It embraces not only general problems of animal classification of animals and new information on their molecular sequences that bear on their wider relationships, but also addresses more specific problems. These include details appraisals of both living and fossil groups. From the fossil record special emphasis is laid on examples from exceptionally preserved biotas that include the Burgess shale-type faunas of the Cambrian of south China and western North America, the Carboniferous Mazon Creek beds of Illinois, and the Jurassic Osteno

beds of northern Italy. In addition, experimental studies of soft-part preservation in jellyfish are relevant to comparable preservation in the fossil record.
