Microbes are the most abundant organisms in the biosphere and regulate many critical elemental and biogeochemical phenomena. Because microbes are the key players in the carbon cycle and in related biological reactions, microbial ecology is a vital research area for understanding the contribution of the biosphere in global warming and the response of the natural environment to climate variations. The beneficial uses of microbes have enabled constructive and cost-effective responses that have not been possible through physical or chemical methods. This new volume reviews the multifaceted interactions among microbes, ecosystems, and their pivotal role in maintaining a more balanced environment,

in order to help facilitate living organisms coexisting with the natural environment. With extensive references, tables, and illustrations, this book provides valuable information on microbial utilization for environmental sustainability and provides fascinating insights into microbial diversity. Key features include: Looks at enhancing plant production through growth-promoting arbuscular mycorrhizae, endophytic bacteria, and microbiome networks Considers microbial degradation and environmental management of e-wastes and azo dyes Explores soil-plant microbe interactions in metal-contaminated soils Examines radiation-resistant thermophiles for engineered bioremediation Describes potential indigenous/effective microbes for wastewater treatment processes Presents research on earthworms and microbes for organic farming Shape, Size, and Volume Lulu.com Enemies are everywhere in this monumental international crime thriller that Brad Thor calls "The Girl with the Dragon Tattoo meets The Sopranos." Hector Guzman has fooled many women. With his quiet charm, easy smile, and smooth demeanor it's easy to fall into his trap, and Sophie Brinkmann, a widowed single mother, is no exception. She quickly learns, though, that his sleek façade masks something sinister. Guzman is the head of a powerful international crime ring with a reach into drugs and weaponry that extends from Europe to South America. His interests are under siege by a ruthless German syndicate who will stop at nothing to stake its claim. But the Guzmans are a family of fighters and will wage war to

protect what ' s rightfully theirs. When Sophie is unwittingly caught in the crossfire, she must summon everything within her to navigate the intricate web of moral ambiguity, deadly obsession, and craven gamesmanship.

This book is a most exciting and unusual study of cultural history. The idea of the pregnant man, redolent of bawdy jokes and sexual fantasy, has inspired European literature and folklore since ancient times. Traces of the theme, both comical and disturbing, are found not only in the wealth of tales from Italy, France, Germany, Russia, Finland and other European Countries, but also in the Hebrew and Islamic traditions.

Size and shape are fundamental properties kids use to identify objects. Many objects are made from basic shapes, like triangles or squares, that are extended to three dimensions. In this book, colorful photographs show familiar objects and define their shapes, such as how a ball is a sphere. Further, kids might be surprised to learn that we can quantify how much space any object takes up, regardless of its shape.

Reconciliation, Transitional and Indigenous Justice - presents fifteen reflections upon justice twenty years after the Truth and Reconciliation Commission of

---

South Africa introduced a new paradigm for political reconciliation in settler and post-colonial societies. The volume considers processes of political reconciliation, appraising the results of South Africa's Commission, of the recently concluded Truth and Reconciliation Commission of Canada and of the on-going process of the Waitangi Tribunal of Aotearoa New Zealand. Contributors discuss the separate politics of Indigenous resurgence, linguistic justice, environmental justice and law. Further contributors present a theoretical symposium focused on *The Conceptual Foundations of Transitional Justice*, authored by Colleen Murphy, who provides a response to their comments. Indigenous and non-Indigenous voices from four regions of the world are represented in this critical assessment of the prospects for political reconciliation, for transitional justice and for alternative, nascent conceptions of just politics. Radically challenging assumptions concerning sovereignty and just process in the current context of settler-colonial states, Reconciliation, Transitional and Indigenous Justice will be of great interest to scholars of Ethics, Indigenous Studies, Transitional Justice and International Relations more broadly. With the addition of one chapter from *The Round Table*, the chapters in this book were originally published as a special issue in the *Journal of Global Ethics*.

Religion is not enough. Culture is not enough. Both religion and culture are important, even crucial to living a full life, but they are not enough. Choosing authenticity is the only thing that is enough. Our deepest desire is for our active lives to actually become more and more an authentic expression of who we are and who we are called to be by that Mysterious Other we call God. We long for a No BS Spirituality that changes the way we actually experience and live our lives. We need spiritual practice that facilitates that growth and transformation, and conversion of heart. It is my prayer that these reflections will respond to that longing. Read, reflect, and enjoy!

The bestselling author of *The Best Democracy Money Can Buy* offers a globetrotting, Sam Spade-style investigation that blows the lid off the oil industry, the banking industry, and the governmental agencies that aren't regulating either. This is the story of the corporate vultures that feed on the weak and ruin our planet in the process—a story that spans the globe and decades. For *Vultures' Picnic*, investigative journalist Greg Palast has spent his career uncovering the connection between the world of energy (read: oil) and finance. He's built a team that reads like a casting call for a Hollywood thriller—a Swiss multilingual

investigator, a punk journalist, and a gonzo cameraman-to reveal how environmental disasters like the Gulf oil spill, the Exxon Valdez, and lesser-known tragedies such as Tatitlek and Torrey Canyon are caused by corporate corruption, failed legislation, and, most interestingly, veiled connections between the financial industry and energy titans. Palast shows how the International Monetary Fund, World Bank, World Trade Organization, and Central Banks act as puppets for Big Oil. With Palast at the center of an investigation that takes us from the Arctic to Africa to the Amazon, Vultures' Picnic shows how the big powers in the money and oil game slip the bonds of regulation over and over again, and simply destroy the rules that they themselves can't write-and take advantage of nations and everyday people in the process.
