Known for his meaty seriocomic novels—expansive works that are simultaneously lowbrow and highbrow—Tom Robbins has also published over the years a number of short pieces, predominantly nonfiction. His travel articles, essays, and tributes to actors, musicians, sex kittens, and thinkers have appeared in publications ranging from Esquire to Harper's, from Playboy to the New York Times, High Times, and Life. A generous sampling, collected here for the first time and including works as diverse as scholarly art criticism and some decidedly untypical country- music lyrics, Wild Ducks Flying Backward offers a rare sweeping overview of the eclectic sensibility of an American original. Whether he is rocking with the Doors, depoliticizing Picasso's Guernica, lamenting the angst-ridden state of contemporary literature, or drooling over tomato sandwiches and a species of womanhood he calls "the genius waitress," Robbins's briefer writings often exhibit the same five traits that perhaps best characterize his novels: an imaginative wit, a cheerfully brash disregard for convention, a sweetly nasty eroticism, a mystical but keenly observant eye, and an irrepressible love of language. Embedded in this primarily journalistic compilation are a couple of short stories, a sheaf of largely unpublished poems, and an off-beat assessment of our divided nation. And wherever we open Wild Ducks Flying Backward, we're apt to encounter examples of the intently serious playfulness that percolates from the mind of a self-described "romantic Zen hedonist" and "stray dog in the banquet halls of culture."

The San Rafael Swell is an anticline, or a geological uplift, that originally looked like an oval bowl turned upside down. Over time it has been carved into castle-like formations and deep canyons by erosive conditions. This landscape seemed so formidable to early cartographers that it was the last area in the continental United States to be mapped. The San Rafael Swell itself has no permanent human inhabitants, but small towns are scattered along its northern and eastern borders where first American Indians and later cowboys, ranchers, and miners made their homes. The hardy settlers of these towns familiarized themselves with what they called "the Desert" and gradually discovered its treasures and its secrets.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. The Spotsylvania Campaign marked a crucial period in the confrontation between Ulysses S. Grant and Robert E. Lee in Virginia. Waged over a two-week period in mid-May 1864, it included some of the most savage fighting of the Civil War and left indelible marks on all involved. Approaching topics related to Spotsylvania from a variety of perspectives, the contributors to this volume explore questions regarding high command, tactics and strategy, the impact of fighting on officers and soldiers in both armies, and the ways in which some participants chose to remember and interpret the campaign. They offer insight into the decisions and behavior of Lee and of Federal army leaders, the fullest descriptions to date of the horrific fighting at the "Bloody Angle" on May 12, and a revealing look at how Grant used his memoirs to offset Lost Cause interpretations of his actions at Spotsylvania and elsewhere in the Overland Campaign. The contributors: _William A. Blair, Grant's Second Civil War: The Battle for Historical Memory _Peter S. Carmichael, We Respect a Good Soldier, No Matter What Flag He Fought Under: The 15th New Jersey Remembers Spotsylvania _Gary W. Gallagher, I Have to Make the Best of What I Have: Robert E. Lee at Spotsylvania _Robert E. L. Krick, Stuart's Last Ride: A Confederate View of Sheridan's Raid _Robert K. This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
