Here, for the first time, General Clark uses his unique life experience—from his difficult youth in segregated Arkansas where he was raised by his poor, widowed mother; through the horror of Vietnam where he was wounded; the post-war rebuilding of national security and the struggles surrounding the new world order after the Cold War—as a springboard to reveal his vision for America, at home and in the world. General Clark will address issues such as foreign policy, the economy, the environment, education and health care, family, faith, and the American dream. Rich with breathtaking battle scenes, poignant personal anecdote and eye-opening recommendations on the best way forward, General Clark's new book is a tour de force of gripping storytelling and inspiring vision.

The book can be viewed as representing the birth of evolutionary biomusicology. What biological and cognitive forces have shaped humankind's musical behavior and the rich global repertoire of musical structures? What is music for, and why does every human culture have it? What are the universal features of music and musical behavior across cultures? In this groundbreaking book, musicologists, biologists, anthropologists, archaeologists, psychologists, neuroscientists, ethologists, and linguists come together for the first time to examine these and related issues. The book can be viewed as representing the birth of evolutionary biomusicology—the study of which will contribute greatly to our understanding of the evolutionary precursors of human music, the evolution of the hominid vocal tract, localization of brain function, the structure of acoustic-communication signals, symbolic gesture, emotional manipulation through sound, self-expression, creativity, the human affinity for the spiritual, and the human attachment to music itself. A selection of more than 150 of Araki's most important works from

the 1970s to the present day, with an emphasis on the recent unpublished production. The book traces Nobuyoshi Araki's career from the 1970s to the present day, with an emphasis on recent production, which will be given broad exposure at the Tokyo Diary 2003-2007 series. Specifically, it comprises a collection of emblematic photographs (one per day), with a new series of nudes and elegant female portraits, and a number of "stories" set in traditional Japan, in which the bamboo forests and the sea immediately recall Okusai's famous prints. Alongside these serial works there are portraits and street photographs taken in the 1960s and 1970s, in which Araki "records" Japanese society during its period of intense economic growth; there are also the new flower compositions and the classic bondage series that made him famous throughout the world.
