The basic structure of  
the EOS Rebel T8i/850D  
camera is similar to  
that of its  
predecessor model EOS  
Rebel T6i. This camera  
has a 24 Megapixel APS-  
C sensor. The new  
generation sensor with  
a dual-chip can  
capture very good  
images in high-  
contrast conditions.  
Due to the presence of  
the Dual-Chip CMOS AF  
sensor, it is much  
faster and has a much

larger coverage area. It  
is possible to make  
some good photos by  
using the Dual-Chip  
CMOS AF sensor. It  
helps in improved AF  
and AF-C performance  
as compared to the EOS  
Rebel T6i.

Furthermore, the user  
can use this camera in  
low-light situations.  
In the photos captured  
in low light, it is  
possible to see a very  
bright bokeh effect.

Also, it has better  
autofocus ability than  
the EOS Rebel T6i. The  
maximum ISO can be set  
up to 16000 and the  
range of ISO  
100-32000. Its  
electronic shutter is  
faster than the EOS  
Rebel T6i. It has a  
new AF algorithm that  
makes it possible to  
track the subject with  
very little user  
effort. The camera can  
also shoot videos in  
4K resolution at 30

---

frames per second. The previous model EOS Rebel T6i can shoot videos only in HD resolution. This camera features a Live View Finder, which can display what is in the viewfinder on the screen. The screen can be tilted up and down from the right side of the camera. The built-in pop-up flash can be attached to the camera to allow users to click portraits with no flash. The viewfinder and the rear LCD are always shown on the top plate and the sensitivity can be adjusted. This is the Manual you need to get started with using this camera seamlessly.
