**Weedopedia** Simon and Schuster In his sixth book, renowned photographer, popular instructor, and best-selling author Bryan Peterson challenges and inspires us to see close-up photography in new ways when we view it through his eyes. You've seen the dewdrops, but what about dewdrops on a bird's wing or raindrops on a car

windshield? You've seen the bumblebees on vibrant flowers, but what about the fluid edge of just one petal or the colorful rusting metal at industrial sites? Even when Peterson does capture the more traditional subjects, it's done in untraditional ways – and often with minimal specialized equipment! Most important, he moves beyond the commonplace to inspire new ways of getting close, using your lenses, and discovering unconventional subjects.

Sets out a simple month-by-month program to reveal all of the night sky's biggest and most beautiful secrets in just one year — and with only a few hours of stargazing each month By investing just an hour a week and \$50 in binoculars, it ' s possible to learn a few simple techniques and quickly gain a real insight into the night sky's ever-changing patterns — and what they tell us about Earth, the seasons and ourselves. Searching more for a learned appreciation of nature and our exact place within the cosmos than academic scientific knowledge, science and travel writer Jamie Carter takes the reader on a 12 month tour of the night sky's incredible annual rhythms that say so much about Earth. During the journey he learns about the celestial mechanics at work in the skies above that are — to the beginner — almost beyond belief. As well as the vital constellations and clusters, and the weird and wonderful nebulas, he searches out “ dark sky destinations ” across the globe that help increase knowledge and give a new perspective on familiar night sky sights. On the journey he witnesses a solar eclipse and grapples with star-charts, binoculars, smartphone apps, telescopes, spots satellites and

attempts basic astro-photography. By year's end, the reader will be able to glance at the night sky from anywhere on the planet and tell what direction he or she is facing, what time it is, where all the planets are and even where the Galactic Center Point is.

When it comes to photography, it ' s all about the light. After spending more than thirty years behind the lens—working for National Geographic, Time, Life, and Sports Illustrated—Joe McNally knows about light. He knows how to talk about it, shape it, color it, control it, and direct it. Most importantly, he knows how to create it...using small hot shoe flashes. In *The Hot Shoe Diaries*, Joe brings you behind the scenes to candidly share his lighting solutions for a ton of great images. Using Nikon Speedlights, Joe lets you in on his uncensored thought process—often funny, sometimes serious, always fascinating—to demonstrate how he makes his pictures with these small flashes. Whether he ' s photographing a gymnast on the Great Wall, an alligator in a swamp, or a fire truck careening through Times Square, Joe uses these flashes to create great light that makes his pictures sing. *Galen Rowell's Inner Game of Outdoor Photography Chronicle*

The book “ *Similar but Different. Bell Beakers in Europe* ” deals with a cultural phenomenon, known as the Bell Beaker culture, that during the 3rd millennium B.C. was present throughout Western and Central Europe. This development played an important role in the formation of the Bronze Age at the turn of the 3rd and the 2nd millennium BC. This book consists of 10 chapters — in each a specific issue is discussed connected with Bell Beakers. The chapters are divided into three parts concerning consecutively: general problems, issues of the so-

called common ware and the character of the Bell Beakers in particular places in Europe. The reader can become acquainted with interpretations of the whole phenomenon, based on inter-regional similarities — the works of H. Case, M. Vander Linden, L. Salanova, and R. Furestier. The second part consist of the chapters by Ch. Strahm, M. Besse and V. Leonini that focus on the matter of the so-called common ware: some ceramic vessels, which are not part of the ‘ beaker set ’, but accompany it in many regions. That is one of the Bell Beakers ’ analytical problems, which is still argued about. The three last chapters show the specific features of some regional centers, where Bell Beakers developed, the attention was focused on the Bell Beakers ’ localities ’. These are the works of A Gibson (Britain), O. Lemerrier (Mediterranean France) and L. Sarti (central Italy). The book shows the basic features of the Bell Beaker culture in Europe. These however are still a challenge for researchers, because the phenomenon had two faces. On the one hand it is characterized by a set of material culture which is occurring in many places Western and Central Europe. On the other hand, in specific areas, these features were relatively easily influenced by the local environment, they got some sort of regional particularities. That is the essence of the Bell Beakers, hence the title of this book: ‘ similar but different ’. This book is a reprint, the first edition was published in 2004 by the Adam Mickiewicz University, Pozna .

The indiscriminate use of chemical substances in industrial processes and anthropogenic activities, have resulted in the release of these compounds into aquatic ecosystems through municipal, hospital and industrial discharges, producing various undesired effects on the environment and on species of ecological

interest. These compounds, such as metals, pesticides, emerging pollutants and other substances are persistent and susceptible to biotic and/or abiotic transformations, yielding metabolites that can be more toxic than the original compounds. In this book, researchers from diverse environmental science disciplines share their experiences in countries such as Argentina, Brazil, Colombia and Mexico, and critically examine the problem of contaminants in aquatic ecosystems in Latin America, as well as the risks presented by their presence.
