Volume V of this manual
provides an overview of the
analytical investigation of
numerous additional Chinese

herbal drugs that are commonly used in Traditional Chinese Medicine (TCM). It illustrates the detailed chromatographic analysis of the main compounds with colored TLC photographs and HPLC peak profiles, and also discusses the bioactive properties, pharmacological and biological activity as well as the therapeutic applications of all single herbal drugs. Together with Volumes I-IV this volume represents the most comprehensive overview of

analytical studies of these drugs listed in the Chinese Pharmacopoeia 2010. All the experimental requirements, including the extraction procedure for the Chinese drugs and the solvent systems used for the development of the TLC and HPLC analytical monographs, were adapted according to the latest findings published in international journals and the high standards of the European Drug Regulatory Authority. Therefore Volume V is also a must-have manual for researchers and

pharmaceutical laboratories dedicated to TCM.

Every time Apple releases a new operating system, we pull together the most essential, in-depth, and up-to-date information about the Mac OS and create a new book that gives our readers access to it all in one place. With Snow Leopard now out and rapidly gaining acceptance, it's time for us to release Total Snow Leopard. Following in the footsteps of our popular,

everything-in-one-place guides to Mac OS X (Total OS X, Total Panther, Total Tiger, and Total Leopard), Total Snow Leopard is an information-packed 102-page book featuring just about everything you'll need to know about Snow Leopard—all features, great and small. We've taken the best of Macworld's coverage of Mac OS X and distilled it into this book, including contributions from such luminaries as Christopher Breen, Glenn Fleishman, Dan Frakes, Rob Griffiths, Joe Kissell, Ted

Landau, Kirk McElhearn, Rich Mogull, Dan Moren, Jonathan Seff, Michael Scalisi, Derrick Story, Ben Waldie, and Sharon Zardetto. The book includes information to help you set up Snow Leopard smoothly and take advantage of its most important features. It'll also help you master the Web with Safari 4, get e-mail with Exchange, keep your Snow Leopard Mac secure, and increase productivity with text substitutions and the Services menu. We think this book is a great resource for everyone who uses Snow Leopard and

Chromatographic Fingerprint Analysis of Herbal Medicines "O'Reilly Media, Inc."

In the not-so-distant past,

color reproduction was considered a craft--one handled by skilled craftspeople using proprietary systems. Today--thanks to the proliferation of desktop systems and devices--everyone and their uncle can get their hands in. But the bottom line is this: It is still a craft--and to apply color consistently and correctly across various hardware, software, and output devices, you need this hands-on project based guide. As the only Apple-certified tutorial on the topic, this book cuts through the theory to go

straight to the heart of the matter: How to set up a Mac OS X-based workflow for those situations in which you employ color: photography and image capture, page layout and content creation, and output (to desktop printer or press). Author and color expert Joshua Weisberg distills a complicated process to its step-by-step essentials through a series of lessons and exercises that you can follow while using the files on the companion DVD.

This book constitutes the refereed proceedings of the 5th International Conference on Audio- and Video-Based Biometric Person Authentication, AVBPA 2005, held in Hilton Rye Town, NY, USA, in July 2005. The 66 revised oral papers

and 50 revised poster papers presented were carefully reviewed and selected from numerous submissions. The papers discuss all aspects of biometrics including iris, fingerprint, face, palm print, gait, gesture, speaker, and signature; theoretical and algorithmic issues are dealt with as well as systems issues. The industrial side of biometrics is evident from presentations on smart cards, wireless devices, and architectural and implementation aspects.
