If you're comfortable using the basic features of Lightroom, but really want to push the envelope with this powerful software, 'Inside Lightroom' by acclaimed photographer and Lightroom Beta-tester Richard Earney is a must-have. Bypassing the obvious

features covered in a variety of existing Lightroom books, Richard focuses on customizing Lightroom to suit your workflow. For example, he covers using presets to automate the way Lightroom deals with photos, optimizing your Lightroom workflow for your own hardware and preferences. He covers sophisticated calibration techniques, helping you render your pictures accurately both onscreen and in print. Basically -- the hidden information for this powerful software. Unlike the other 'guides' on the market, this book doesn't tell you what you already know. Instead, it focuses on what you don't. 'Inside Lightroom' also showcases the brand-new features of the software, available only in Lightroom 2.0, so if you have recently upgraded from Lightroom 1, this book will help you reap the benefits of your investment. Practical, jargon-free and full of stunning images, Richard Earney's book should be on the shelf of every Lightroom user.

Increasing numbers of ecologists and conservation biologists have begun to explore the use of drone technology to obtain accurate and up-to-date data on the distribution and density of species, as well as the threats to their habitats, in their ongoing attempts to conserve and monitor biodiversity. Conservation drones are low-cost, autonomous, and operator-friendly unmanned aerial vehicles that can be used for surveying, mapping, and monitoring both habitat and biodiversity. They are fast becoming a valuable complement to ground-based surveys and satellite imagery for a wide range of ecological and conservation applications. The authors pioneered the use of conservation drones for the purpose

of monitoring orangutan populations in Southeast Asia. They subsequently founded ConservationDrones.org to share their knowledge of building and using drones with colleagues in the wider environmental community. This website has proved highly popular and this book aims to further build capacity to use drones and inspire others to adapt emerging technologies for practical conservation.
