Nearly all of us have to work, but how much do we really know about what other people do all day? What is it like to be a fishmonger, a sex worker or an Orthodox rabbi? Or a banker, a research scientist or a carer? How do our jobs affect our lives, beliefs and happiness? And what happens when we don't work? Joanna Biggs has travelled the country to find the answers, talking to interns and bosses, professionals and entrepreneurs, thinkers and doers. She takes us from Westminster to the Outer Hebrides, from a hospital in Wales to the industrial Midlands, introducing us to different worlds of work and the people who inhabit them. Rich with the voices of the wealthy and poor, native and immigrant, women and men of the UK in the twenty-first century, All Day Long shows us who we are through what we do.

Completely revised and updated throughout, Bryan Peterson's classic guide to creativity helps photographers visualize their work, and the world, in a whole new light by developing their photographic vision. Fully revised with all new photography, this best-selling guide takes a radical approach to creativity by explaining that it is not an inherent ability but a skill that can be learned and applied. In the years after World War I, the defeated and much-reduced German Army developed new clothing and personal equipment that drew upon the lessons learned in the trenches. In place of the wide variety of uniforms and insignia that had been worn by the Imperial German Army, a standardized approach was followed, culminating in the uniform items introduced in the 1930s as the Nazi Party came to shape every aspect of German national life. The outbreak of war in 1939 prompted further adaptations and simplifications of uniforms and insignia, while the increasing use of camouflaged items and the accelerated pace of weapons development led to the appearance of new clothing and personal equipment. Medals and awards increased in number as the war went on, with grades being added for existing awards and new decorations introduced to reflect battlefield feats. Specialists such as mountain troops, tank crews and combat engineers were issued distinctive uniform items and kit, while the ever-expanding variety of fronts on which the German Army fought – from the North African desert to the Russian steppe – prompted the rapid development of clothing and equipment for different climates and conditions. In addition, severe shortages of raw materials and the demands of clothing and equipping an army that numbered in the millions forced the simplification of many items and the increasing use of substitute materials in their manufacture. In this fully illustrated book noted authority Dr Stephen Bull examines the German Army's wide range of

uniforms, personal equipment, weapons, medals and awards, and offers a comprehensive guide to the transformation that the German Army soldier underwent in the period from September 1939 to May 1945.

The Workshop on the Economics of Information Security (WEIS) is the leading forum for interdisciplinary scholarship on information security, combining expertise from the fields of economics, social science, business, law, policy and computer science. Prior workshops have explored the role of incentives between attackers and defenders, identified market failures dogging Internet security, and assessed investments in cyber-defense. Current contributions build on past efforts using empirical and analytic tools to not only understand threats, but also strengthen security through novel evaluations of available solutions. Economics of Information Security and Privacy III addresses the following questions: how should information risk be modeled given the constraints of rare incidence and high interdependence; how do individuals' and organizations' perceptions of privacy and security color their decision making; how can we move towards a more secure information infrastructure and code base while accounting for the incentives of stakeholders?
