This collection of intimate and emotional reflections about legendary water woman Rell Sunn is truly inspirational.

Sunn's renowned skills as a lifeguard, diver, spearfisher, and bodysurfer and her role in pioneering the world of women's surfing has touched people both in Hawaii and internationally. At the heart of Rell Sunn was her spirited enthusiasm and passion for life, but it was her extension of aloha that really, truly made an impact on everyone she met.

This book includes stories from such renown water sport enthusiasts as Rabbit Kekai, Fred Hemmings, Bonga Perkins, Kathy Terada, Sunny Garcia, Jeannie Chesser, Mark Cunningham, Kalani Robb and many others.

In his paintings, English perverts and subverts the establishment, poking fun at religion, consumerism, and blind obedience to popular culture. He uses humour as a wake-up call, and renders it with meticulous brush strokes. Ron English populates alternate versions of 'The Last Supper' and 'Guernica' with cartoon characters, drops camouflaged clowns on dinosaurs, and births incredible creatures from his fertile imagination. In addition to over 180 images from his paintings, Status Factory includes over 100

photographs of English's street art installations.

Enter the world of The Storm Makers, where there's magic behind every forecast. What starts as an ordinary summer turns exciting and perilous for twins Ruby and Simon when strange occurrences begin happening on their farm -- sudden gusts of wind, rainstorms, and even tornado warnings -- that seem eerily timed to Simon's emotions. Then a stranger arrives and tells the

twins that Simon is a Storm Maker -- part of a clandestine group of people entrusted with controlling and taming the weather -- and that he is in great danger. Soon Simon and Ruby must race against the clock as they try to master Simon's powers in time to stop a rogue Storm Maker's treacherous -- and potentially deadly -- plans. In this thrilling new adventure, loyalties can shift as quickly as the wind . . . and the ordinary can turn extraordinary in the blink of an eye.

Secret Siam presents over 300 of Mark Hejnar's rich photographic images, reproduced in full-colour throughout, accompanied by a series of concise explanatory texts. It stands as a unique visual introduction to one of the world's most fascinating and yet seldom explored artistic cultures. From religious folk-paintings to infernal torture sculptures, from half-buried gods in temple cave complexes to the spectral

dolls who beckon from derelict spirit houses, Hejnar has captured a revelatory world of the marvellous and the monstrous.

Sermons Preached in Lincoln's Inn Chapel Lucas Books

In Scorecasting, University of Chicago behavioral economist Tobias Moskowitz teams up with veteran Sports Illustrated writer

L. Jon Wertheim to overturn some of the most cherished truisms of sports, and reveal the hidden forces that shape how basketball, baseball, football, and hockey games are played, won and lost. Drawing from Moskowitz's original research, as well as studies from fellow economists such as bestselling author Richard Thaler, the authors look at: the influence home-field advantage has on the outcomes of games in all sports and why it exists; the surprising truth about the universally accepted axiom that defense wins championships; the subtle biases that umpires exhibit in calling balls and strikes in key situations; the unintended consequences of referees'

tendencies in every sport to "swallow the whistle," and more. Among the insights that Scorecasting reveals: • Why Tiger Woods is prone to the same mistake in high-pressure putting situations that you and I are • Why professional teams routinely overvalue draft picks • The myth of momentum or the "hot hand" in sports, and why so many fans, coaches, and broadcasters fervently subscribe to it • Why NFL coaches rarely go for a first down on fourth-down situations--even when their reluctance to do so reduces their chances of winning. In an engaging narrative that takes us from the putting greens of Augusta to the grid iron of a small

parochial high school in Arkansas, Scorecasting will forever change how you view the game, whatever your favorite sport might be.

Originally published to great acclaim in 1976, *The American Monument* has become one of the most sought-after photography publications of the 20th century. Long out of print, this second edition is once again available again for all to enjoy and own. Published in the same oversized format as the first edition with exquisite duotone reproductions of the original 213 photographs the album of post-bound single

sheets can easily be disassembled for display. Considered by many, including Friedlander himself, to be one of his most important books, *The American Monument* has influenced generations of photographers, curators and art historians. The second edition includes the original essay by Eakins Press founder Leslie George Katz along with a new essay by eminent past NYCs Museum of Modern Arts photography curator and Friedlander scholar Peter Galassi, which illuminates the history and continued significance of this iconic artist

and this early publication. The deeply influential American curator of photography at MoMA during the 1960s-70s, John Szarkowski (1927-2007), stated: I am still astonished and heartened by the deep affection of those pictures, by the photographers' tolerant equanimity in the face of the facts, by the generosity of spirit, the freedom from pomposity and rhetoric. One might call this work an act of high artistic patriotism, an achievement that might help us reclaim that word from ideologues and expeditors. Lee Friedlander is the recipient of

three Guggenheim Fellowships as well as a MacArthur Fellowship. He has published more than 50 monographs since 1969, and exhibited extensively around the world for the past five decades, including a major retrospective at the MoMA, NY, in 2005.

Cream's debut cookbook, a yearbook of ice cream accomplishments—all the recipes you need to create delicious frozen treats. • New to making ice cream at home? Never fear—freshman year starts off simple with store-bought toppings and shopping lists for the home ice cream parlor. • Sophomore year kicks it up a notch with tasty sauces and crunchy toppings. • Junior year puts your new skills to work with shakes, floats, and sundaes inspired by some of Big Gay Ice Cream's top-selling treats, including, of course, the Salty Pimp. • In Senior year, get serious with outrageously delicious sorbets and ice cream recipes. Along the way, you can

enjoy Bryan and Doug's stranger-than-fiction stories, cheeky humor, vibrant photography and illustrations, and plenty of culinary and celebrity cameos (including an introduction by Headmaster Anthony Bourdain). *Cathy's Orchid - That Night, Next Morning and Next Afternoon* Franklin Classics

If IPv6 is to be adopted on a large scale, the applications running on desktop systems, laptops, and even mobile devices need to work just as well with this protocol as they do with IPv4. This concise book takes you beyond the network layer and helps you explore the issues you need to

address if you are to successfully migrate your apps to IPv6. It's ideal for application developers, system/network architects, product managers, and others involved in moving your network to IPv6. Explore changes you need to make in your application's user interface. Make sure your application is retrieving correct information from DNS. Evaluate your app's ability to store and process both IPv6 and IPv4 addresses. Determine if your app exposes or consumes APIs where there are IP address format dependencies. Work with the

network layer to ensure the transport of messages to and from your app. Incorporate IPv6 testing into your plans, and use the correct IPv6 addresses in your documentation.

Zebrafish (*Danio rerio*) play an integral role in biomedical research, enabling researchers to examine physiological mechanisms and pathways relevant to human pathogenesis and its therapy. That, along with their low cost, easy manipulation, short reproductive cycles, and physiological homology to humans, has made zebrafish a vital model organism for

neuroscience research. Zebrafish Protocols for Neurobehavioral Research addresses protocols for both larval and adult models, written by the leading experts in the field of zebrafish research.

Part I of this book takes advantage of the high-throughput nature of larval models to offer protocols for research requiring high output, easily manipulated screens. The second half of the book focuses on the robust and sophisticated behaviors of adult zebrafish, suitable for the neurophenotyping of complex traits and multi-domain disorders. Importantly, these models complement each other, working together to provide researchers with valuable insights into neurobiology of normal and

pathological behavior. Thorough and cutting-edge, this volume is a useful, authoritative reference guide that should hold a coveted spot in zebrafish laboratories across the globe.
