This report describes the Act and states the reasons for our conclusion that the Act should be repealed. It also contains the text of the Act, describes the survey conducted of members of the legal profession regarding their views on the Act, and summarizes the most frequently expressed reasons for retaining the Act, and states why it was concluded that those reasons were overborne by those in favour of repeal. Finally, it describes some approaches that could be taken to reforming rather than repealing the Act.

This book addresses the challenges and subtleties behind marketing to women and confronts the idea that gender alone can be used as an indicator to target your market. Darroch provides practical

Linked from the days of their origins, psychology and advertising developed as independent disciplines at almost the same time in the late nineteenth century. Providing an important arena in which psychologists have tested methods and theories, advertising has been a stimulus for research and development in such diverse specialties as learning and behavioral decision theory, psychometrics, perception, and social and mathematical psychology. Psychology, in turn, has contributed a wide assortment of tools, theories, and techniques to the practice of advertising. These contributions have found their place in virtually all areas of advertising practice -- stimulating creativity, evaluating the creative product, and informing the scheduling of media. Purposely eclectic, this volume presents new issues in consumer psychology and advertising such as the relationship between gender differences, cortical organization and advertising; new approaches to old issues such as attention as an

epiphenomenon, and meta-analysis of comparative advertising research; and new applications of consumer psychology to other fields such as examining health behavior as consumer behavior, affect and political advertising, and the relationship between advertising and eating disorders. This volume is the result of the Sixth Annual Advertising and Consumer Behavior Conference, which was designed to bring together researchers and practitioners from both psychology and advertising. Chapter contributions are made by professionals in advertising and marketing, professors in psychology and marketing departments, and psychologists who consult for advertising and marketing organizations. Thus, the chapters represent a microcosm of the type of interaction that has characterized the interface of psychology and advertising for more than a hundred years.

The Canon PowerShot G16 compact digital camera is the successor to the successful G15 and the first in the G-series to come equipped with built-in Wi-Fi. This facility makes it ideal for sharing images and video on social networking websites, or via email through the Canon Image Gateway. Images can also be uploaded using the maker's compatible iOS(R) or Android device with the download of a free Canon CameraWindow app. The G16's 28-140mm wide-angle lens has an aperture range of f/1.8-f/2.8, making it ideal for shooting in low-light conditions or for capturing a dramatic shallow depth-of-field with soft backgrounds. The camera features Canon's HS System, which combines a DIGIC 6 image processor and a 12.1-megapixel High-Sensitivity CMOS image sensor. Autofocus (AF) times and reduced shooting lag are improved over previous G-series models and continuous shooting speeds of up to 9.3 frames-per-second are possible. The G16 captures 1080p/60p Full HD video and has a built-in stereo microphone and an HDMI output for viewing videos on an HDTV. New shooting modes include Star mode for capturing the night sky: Star Nightscape will capture stars in a landscape image, while Star Trails will capture trails of stars in a still image; Star Time Lapse Movie will shoot continuous still images of stars and combine them into a video that replicates the motion of the stars in the sky. With the handheld HDR Scene mode multiple shots of a particular scene are combined to create a high dynamic range image without the need for a tripod. This mode includes Natural, Art Bold, Art Embossed, Art Standard and Art Vivid options. The dials and controls on this digital compact camera are styled similarly to those on Canon's range of EOS digital SLR cameras. The G16 is also compatible with Canon Speedlite flashes and select accessories.

Over 70 authors and veterans share the sacrifices so many of America's veterans have made, in peacetime and in war, throughout the 20th century. You'll read about Duty, Honor, Courage - from the testing of a submarine, to the loss of the Space Shuttle Challenger, to the everyday sacrifice of men and women in uniform, whether serving during peace or war. You'll walk bloodied beaches, soar over enemy turf, pray, crawl in and out of caves, tend the wounded, shoot and be shot at, feel your heart race with fright as flak comes at you

from every direction...walk the deck...hit the deck...feel the heat as fire dances across the deck, into the cockpit and into the foxhole you occupy. Your heart will constrict as the man in front of you takes the bullet meant for you. You'll know the painful bite of shrapnel, the gnawing ache hunger brings and red-hot anger as a comrade falls. But most of all, you'll experience total, unabridged fear as you watch the enemy advance through the eyes of the author, and a swelling of pride as you meet America's veterans.
