Economics Hachette UK From the foreword: "One of the High Line's powers is its ability to evoke time, to remind us of the changes we've experienced during our own lives, to bring forth echoes of the past, and to make us guess what life might be like years from now. I love the photos on these pages, because they have that power, too." --Joshua David, Co-Founder of the Friends of the High Line. Ten Avenues Press, in association with Friends of the High Line, announce the publication of High Line Nudes. In 2006, photographer Kevin McDermott took three of his friends up on the abandoned railroad tracks that would become New York City's High Line park to shoot a series of nudes.

As McDermott states in his introduction, "at the time I took these photos, what I sought from its beauty was its sense of isolation, being alone, surrounded by nature in the middle of this metropolis." A decade later, this location is now one of the most visited tourist destinations in NYC and one of the largest real estate developments in the world. High Line Nudes captures a seemingly impossible, but beautiful moment in the history of the West Side Rail Yards, Chelsea and an ever changing New York City. The cloth hardcover book is beautifully printed in color and rich black and white duotone images.

Learn Unity for 2D Game Development ESRI, Inc. Updated, expanded, and covering the latest software, this new edition of the bestselling Digital Landscape Photography brings the amazing techniques pioneered by Ansel Adams and his contemporaries to every digital photographer. Ansel Adams' imagery - especially his iconic vision of the American National Parks - is widely published and instantly recognisable. Many photographers will have heard of his renowned Zone System, but that is just the tip of the iceberg; his unparalleled

attention to detail, which once required hours in the darkroom with specialist tools, is finally accessible to all. Michael Frye's own photography provides many stunning examples of the results that can be achieved, and as one of Adams' natural successors in the field, he is well placed to analyse the many inspirational shots from the great masters of landscape photography. Combining the cutting edge of today's digital work with some of the best-known photos ever taken, this book a must-read for any landscape or nature photographer.

The Camera Radar
Instruction Manual Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a

standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs Flower Portraits In the years after World War I, the defeated and much-reduced German Army developed new clothing and personal equipment that drew upon the lessons learned in the trenches. In place of the wide variety of uniforms and insignia that had been worn by the Imperial German Army, a standardized approach was followed, culminating in the uniform items introduced in the 1930s as the Nazi Party came to shape every aspect of German national life. The outbreak of war in 1939

prompted further adaptations and simplifications of uniforms and insignia, while the increasing use of camouflaged items and the accelerated pace of weapons development led to the appearance of new clothing and personal equipment. Medals and awards increased in number as the war went on, with grades being added for existing awards and new decorations introduced to reflect battlefield feats. Specialists such as mountain troops, tank crews and combat engineers were issued distinctive uniform items and kit, while the ever-expanding variety of fronts on which the German Army fought – from the North African desert to the Russian steppe – prompted the rapid development of clothing and equipment for different climates and conditions. In addition, severe shortages of raw materials and the demands of clothing and equipping an army that numbered in the millions forced the simplification of many items and the increasing use of

substitute materials in their manufacture. In this fully illustrated book noted authority Dr Stephen Bull examines the German Army's wide range of uniforms, personal equipment, weapons, medals and awards, and offers a comprehensive guide to the transformation that the German Army soldier underwent In the period from September 1939 to May 1945.

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival.

Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health

sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

Over 2,000 manuscripts accessioned between 1991 and 1995 are described and indexed in this latest volume of the Catalogue of Additions. They range from a 9th-century

fragment of St Aldhelm's work to papers of the contemporary author Edward Upward and the economist Sir Roy Harrod. The Trumbull family papers in 380 volumes are the largest of the historical collections catalogued here, whilst modern composers are especially well represented by the comprehensive archives of Cornelius Cardew, Humphrey Searle, Andrzej Panufnik and Sir Peter Maxwell Davies. Notable single volumes include two Books of Hours of the 14th and 15th centuries and Sir William Dugdale's "Book of Monuments" (1640-1641).
