Naturbeobachtung als Hobby ist recht g ü nstig – ein gutes Fernglas, eine Lupe, gute Bestimmungsliteratur, das gen ü gt oft schon. Die Gl ü cklichsten unter uns verlassen sich aber auch nur auf Augen, Nase, Ohren und Tastsinn. Will man jedoch seine Erlebnisse auch im Bild festhalten, wie viele Naturbeobachter, dann kann es schon teuer werden. Je nach

Anspruch mit einer kompakten Knipse (ist nicht abwertend gemeint!), einer DSLR oder spiegellosen Systemkamera, entsprechenden Objektiven und Zubehör – von moderat dreistellig bis hoch fünfstellig ist alles drin. Eine mögliche Alternative, sowohl preislich als auch im Hinblick auf Ausstattung und Zubehör, sind die Bridgekameras, eine Synthese aus Kompakt- und Spiegelreflexkamera. Für uns Naturbeobachter besonders interessant sind die sogenannten Superzooms, und mit deren Möglichkeiten, Schwächen und Stärken wollen wir uns in diesem Buch auseinandersetzen.

This book is for anyone who wants to get the best shots possible but isn't sure what to do next. There's the manual, as well as competing books, and while they all tell camera owners, often in 400+ pages, what the camera can do, none of them shows them exactly how to use their camera to create great images!

Everything in the book is in service of creating a great image. The author carefully guides readers through the modes of the camera and gives practical advice from a pro on which settings to use when, shooting tips, and even end-of-chapter assignments so readers can test their knowledge.

Starting with the top ten things users needed to know about the camera, author Jeff Carlson carefully guides

readers through the operating features. Owners get practical advice from a pro on which settings to use when, great shooting tips, and even end of chapter assignments.
