Years ago when most Jews lived in fairly close communities and were more observant of religious rituals, couples having a baby found it easy to get information about having a bris if the baby was a boy. Now with many young Jewish couples living far from their parents and home communities and having less knowledge about and observance of Jewish customs, such information is not as readily available. That is why this book has been written. Its goal is to provide clear, accurate information about all aspects of the modern bris ceremony. The information in this book will help couples 1) make

decisions about having a bris, 2) choose a mohel, and 3) understand the medical and religious aspects of this significant family event.

Images are just as much in motion as people. In a globalized world they can move faster and more freely than humans. When artist Armin Linke was invited more than seven years ago to participate in a

photographic project on the island of Lampedusa, he left his camera at home because he thought that there would already be plenty of photos available there. Instead, he took with him on the trip a team from the Karlsruhe University of Arts and Design so that they could talk with local image makers about their photographs. Four years later, he approached Spector Books about the possibility of turning the photos and interview material he had collected into a book. The publishing house studied the pictures and suggested adopting the form of a photo-graphic novel, in which drawings comment on the photographs, thus creating an external perspective on the images.
