Images are just as much in motion as people. In a globalized world they can move faster and more freely than humans. When artist Armin Linke was invited more than seven years ago to participate in a photographic project on the island of Lampedusa, he left his camera at home because he thought that there would already be plenty of photos available there. Instead, he took with him on the trip a team from the Karlsruhe University of Arts and Design so that they could talk with local image makers about their photographs. Four years later, he approached Spector Books about the possibility of turning the photos and interview material he had collected into a book. The publishing house studied the pictures and suggested adopting the form of a photo-graphic novel, in which drawings comment on the photographs, thus creating an external perspective on the images.

Unemployment in Southern Europe: Coping with the Consequences Cengage Learning Ptr

In the decades since its initial publication in German in 1978, Polychrome Sculpture has come to be widely regarded as a watershed text on the making and meaning of European medieval and Baroque painted wood sculpture.

An early proponent of interdisciplinary research, Johannes Taubert played a pioneering role in combining the rigorous scientific

analysis of materials with a fuller understanding of form and function, an approach that has led to the development of technical art history as practiced today. Many of the essays in this volume apply such scientific techniques as microscopic analysis to an art-historical understanding of Romanesque and late Gothic wood sculpture, revealing that, far from serving a merely decorative function, the painted surface of these works was intricately connected to their meaning. The paint layers on the sculptures, for example, which the author spent years documenting through close examination and analysis, were intended to impart a heightened sense of reality to the life-sized sculptures, thereby enhancing the viewer's experience of worship. Taubert believed it was crucial for conservators to understand this context before undertaking any treatments. No

other book offers such a focused, subtle, and interdisciplinary examination of the subject as *Polychrome Sculpture*. This influential work is now available in English for the first time, in a meticulous translation enhanced and updated by new color illustrations, annotations to the original text, and a new introduction.

Years ago when most Jews lived in fairly close communities and were more observant of religious rituals, couples having a baby found it easy to get information about having a bris if the baby was a boy. Now

with many young Jewish couples living far from their parents and home communities and having less knowledge about and observance of Jewish customs, such information is not as readily available. That is why this book has been written. Its goal is to provide clear, accurate information about all aspects of the modern bris ceremony. The information in this book will help couples 1) make decisions about having a bris, 2) choose a mohel, and 3) understand the medical and religious aspects of this significant family event.

With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos

are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.
