"Everything is autobiographical and everything is a portrait, even if it's only a chair.' Portraits were central to the work of Lucian Freud. Working only from life, the artist claimed 'I could never put anything into a picture that wasn't actually there in front of me.' Lucian Freud Portraits surveys his portraits and figure paintings from across his long career. Drawing together the finest portraits from public and private collections around the world, the book explores Freud's stylistic development and technical virtuosity. A series of previously unpublished interviews conducted by Michael Auping between May 2009 and

January 2011 reveal the artist's thoughts on the complex relationship between artist and sitter, the particular challenges of painting nudes and self-portraits, and his views on other painters he admired. Freud's psychological portraits are often imbued with a mood of alienation. A private man, the artist's close relationship with his sitters was played out behind the closed door of the studio. Frequently there is the sense of an emotionally charged drama unfolding, but his subjects remain elusive. Sitters represented in the book include family members, particularly his mother, Lucie, and artists such as Frank Auerbach, Francis Bacon and David Hockney. In the early 1990s Freud produced a series of monumental paintings of the performance artist Leigh Bowery and Bowery's friend Sue Tilley, the 'benefits supervisor', examples of which are reproduced in this book."--Publisher description.

With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.
