An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom... bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice

when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time. *Popular Photography* IGI Global Canon Sureshot AF35M Service Manual Aviation Unit Maintenance and Aviation Intermediate Maintenance Manual (including Repair Parts and Special Tools

The Canon EOS 7D Mark II – a major update to the very popular 7D from 2009 – is a powerful camera intended for everyone from beginners to advanced amateurs to professionals alike. With boosts in technology that significantly improve autofocus, video, and frame rate (the camera can shoot an astounding 10 frames per second!), the 7D Mark II is poised to be a big hit this fall. This book, in the popular From Snapshots to Great Shots series, is for anyone who upgrades from a point-and-shoot or for anyone who wants to jump into photography with the control and capabilities of a powerful DSLR. There's the manual, of course, as well as competing books, and while they all explain, often in 400+ pages, what the camera can do, none of them shows exactly how to use the camera to create great images! This book has one goal: to teach Canon EOS 7D Mark II owners how to make great shots using their camera. Everything in the book is in service of creating a great image. Starting with the top ten things needed to know about the camera, photographer Jeff Revell then carefully guides readers through the modes of the camera. Users get practical advice from a pro on which settings to use when, great shooting tips, and even end-of-chapter assignments. The Canon EOS 7D Mark II will be available at the end of

November 2014. Features include: 20.2 MP sensor; 10 frames per second continuous shooting; wireless flash control; 1080p HD video recording; 65-point autofocus; and more.

Separation distinction between the roles of the producer and consumer has become blurred with the development of new science and technologies enabling the emergence of the prosumer, or the active consumer. In the IT sector, the role of the end-user has broadened to include innovation and development practices in addition to the traditional consumer activities. As such, businesses must create opportunities for product development and innovation by the consumers. Frameworks of IT
Prosumption for Business Development investigates the latest empirical research on active use of information technology resources, enabling users with new methodologies, tools, and opportunities to impact application development processes. The objective of this reference book is to mobilize end-users to take a more active role in their own IT solutions, which will in turn assist in the development of best practices in IT at all levels.
