Work Made Fun Gets Done! Chandos Publishing

This is the first full-length study to examine the links between high Romantic literature and what has often been thought of as a merely popular genre - the Gothic.

Michael Gamer offers a sharply focused analysis of how and why Romantic writers drew on Gothic

conventions whilst, at the same time, denying their influence in order to claim critical respectability. He shows how the reception of Gothic literature, including its institutional and commercial recognition as a form of literature, played a fundamental role in the development of Romanticism as an ideology. In doing so he examines the early history of the Romantic movement and its assumptions about literary value, and the politics of reading, writing and reception at the end of the eighteenth century. As a whole the book makes an original contribution to our understanding

of genre, tracing the impact of reception, marketing and audience on its formation.

The convergence of online book selling, digital printing, digital document workflow management and the computerization of small parcel logistics created a unique opportunity to create a viable commercial model for printing and supplying books on demand. This innovation was swiftly embraced by the academic publishing

community heralding the rescue of the languishing academic monograph. The possibilities captured the imagination of creative academic and niche publishers enabling custom publishing, student editions of monographs, self-compiled wiki books and even the establishment of new university presses and open access publishers. The Impact of Print on-Demand on Academic Books takes an in-depth look at this phenomenon by looking back on two decades of innovation, reviewing the present state of academic publishing with respect to works being printed on demand and compiling the current forecasts and speculation about the future of academic and

Creative Rambles Write Roads Wolters Kluwer Crap. We all have it. Filling drawers. Overflowing bins and baskets. Proudly displayed or stuffed in boxes in basements and garages. Big and small. Metal, fabric, and a whole lot of plastic. So much crap. Abundant cheap stuff is about as American as it gets. And it turns out these seemingly unimportant consumer goods offer unique insights into ourselves—our values and our desires. In *Crap: A History of Cheap Stuff in America*, Wendy A. Woloson takes seriously the history of objects that are often cynically-made and easy to dismiss: things not made to

last; things we don't really need; things we often don't even really want. Woloson does not mock these ordinary, everyday possessions but seeks to understand them as a way to understand aspects of ourselves, socially, culturally, and economically: Why do we—as individuals and as a culture—possess these things? Where do they come from? Why do we want them? And what is the true cost of owning them? Woloson tells the history of crap from the late eighteenth century up through today, exploring its many categories: gadgets, knickknacks, novelty goods, mass-produced collectibles, giftware, variety store merchandise. As Woloson shows, not all crap is crappy in the

Companies,
communities, and
individuals fall for
many reasons, but one
of the most common—and
easily avoidable—is
the failure to

reinvent. When people and organizations rest on prior successes rather than driving purposeful transformation, they discover too late that they have lost their market position altogether to competitors and external forces. The most successful companies, brands, and individuals make reinvention a regular part of their business strategies. Transformation demands an ongoing process of discovery and imagination, and The Road to Reinvention lays out a systematic approach for continually challenging and reinventing yourself and your business. Venture capitalist and serial entrepreneur Josh Linkner identifies six

elements in any business that are ripe for reinvention and shares examples, methods, and step-by-step techniques for creating deliberate, productive disruption. Throughout The Road to Reinvention, Linkner also explores the history—the great rise, unprecedented fall, and now rebirth—of his beloved hometown, Detroit. First rising to greatness as the result of breathtaking innovation, Detroit had generations of booming growth before succumbing to apathy, atrophy, and finally bankruptcy. Now, the city is rising from the ashes and driving sustainable success through an intense focus on reinvention. Linkner brings an insider's view of this incredible story of

grit, determination, and creativity, sharing his perspective on Detroit's successes and setbacks as a profound example of large-scale organizational and personal transformation. Change is inevitable. You need to decide: Will you drive that change, or be driven away by it? Will you disrupt or be disrupted? By choosing to deliberately reimagine your own status quo, you can secure a strong future for both your company and your career.

My family moved to Clearwater, Fl. where my father was a store manager in nearby Tampa. We later moved to Savannah, Ga. after my father became a Pastor. I have claimed Savannah, Ga. as home where I grew up and went to High School and College. I joined the Marine Corps and went to boot camp at Paris Island, S.C. in September of 1984. I was honorably discharged from active duty in May of

After about a year at the plant, I went to work selling copiers for a Fortune 500 company. Other than a brief stint owning a bar in downtown Savannah, I have been in the copier business selling solutions ever since.
