"This is the second of two volumes devoted to 19th-century American paintings at the National Gallery of Art. Arranged alphabetically by artist and chronologically by date of execution, this volume includes works by Gari Melchers through Alexander Helwig Wyant and contains many well-known masterpieces, such as Thomas Sully 's Lady

with a Harp: Eliza Ridgely and James McNeill Whistler ' s Symphony in White, No. 1: The White Girl. This portion of the collection is particularly strong in early 19th-century portraiture, of which the 19 by Thomas Sully form an outstanding group. Among the later 19th- and early 20th-century portraitists John Singer Sargent is particularly well represented. Entries define how a given painting fits into a stage of the artist ' s development, list related works, summarize previous scholarly literature, and interpret the images within their full social and historical context"--National Gallery of Art website.

-With a preface by Mark Blaisse, author of *Before They Passed Away*, this book picks out one street in 200 different cities across the 7 continents -By means of infographics and a short text, the street becomes a symbol for a culture, a country in its entirety -Seven years of travel were needed to make this book -With a focus on detailed street knowledge, this is the perfect gift for travelers and photography enthusiasts alike 200 countries; one street each; seven years of traveling and collecting photos, stories, facts and figures about each country. This is not just another photography book. It reveals everything that a street means to society:

education, wisdom, youth, experience, happiness, stories, food, and so much more. This is the raw material of life, drawn directly from the experiences of the Belgian photographer Jeroen Swolfs. Seeing the street as a unifying theme, he traveled in search of that one street in each place - sometimes by a harbor or a railway station - that comprised the country as a whole. Each stunning image conveys culture, colors, rituals, even the history of the city and country where he found them. Swolfs sees the street as a universal meeting place, a platform of crowds, a center of news and gossip, a place of work, and a playground for children. Indeed, Swolfs's streets are a matrix for community; his photographs are published at a time when the unique insularity of local communities everywhere has never been more under

threat.

Creating mouth-watering food images requires more than just a love of food and access to a kitchen. With the popularity of food blogs and photography how-tos, it's tempting to think that anyone can photograph food, but it's another thing entirely to shoot for a tight ad layout with the pressure of your client watching over your shoulder. Commercial food photographer Teri Campbell has been called a "lighting master," and in this beautifully illustrated book, he not only shares his detailed lighting set-ups and shooting techniques for a wide range of food and drink shots, but also offers candid advice on how to set up a studio, use the right equipment, market your work, find clients, bid on assignments,

hire food and prop stylists, and communicate effectively with everyone on the set. Campbell shares his expertise on dozens of commercial assignments – from shooting beignets on location in New Orleans, to creating perfect ice tea pours, to photographing beans on real flames in his studio. Learn how he creates dynamic compositions, uses studio strobes, and arranges light diffusers, reflectors, fill cards, and mirrors, to create the perfect capture. Campbell also discusses his post-processing techniques in Adobe Camera Raw and Adobe Photoshop to create images that are irresistible. This guide for intermediate and advanced users provides the insider details to help you expand your photography skills or turn your passion for food and images into a professional career.

With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert

commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment. Adobe Photoshop Lightroom is truly an awesome program, and the primary editing tool for so many photographers today. But, at some point, you realize that there are things you need to do to your images that Lightroom just can't do. It could be anything from pro-level portrait retouching, to blending two or more images together, to incredible special effects, to removing distracting things in your image, to adding beautiful type to

Scott ' s favorite (and most useful) portrait retouching techniques; his favorite special effects for landscape, travel, and people photos; plus which filters are awesome (and which ones waste your time). Also, you ' ll learn how to mask hair and create super-realistic composites (you ' ll be amazed when you learn how easy this is), plus how to take advantage of all the latest Photoshop technology, how to leverage the latest features (so you ' re doing things

the easy way), and a bunch of today ' s most popular techniques (the same commercial looks you ' re seeing in hot demand), so you ' ll be using Photoshop like a shark in no time. If you ' ve been saying to yourself, " Ya know, I really should learn Photoshop," you ' re holding the absolute best book to get you there, coming from the guy who literally wrote the book on Lightroom. He knows how to help you make the most of using these two powerful tools together to take your images (and your fun) to the next level. You are going to love being a Photoshop shark!
