A comprehensive guide with step-by-step, practical tips on how to get the most out of this versatile camera The Rebel T4i/EOS 650D is the latest in a long line of Rebel/XXXD series of DSLR cameras that began with the Digital Rebel/300D camera of 2003. The Rebel T4i/EOS 650D builds on the strengths of its predecessors, making it the most refined model in the series to date. The camera features some intriguing new technology: the most significant change is the Hybrid CMOS AF system that improves the speed of focus when shooting still-images and movies in Live View. It's also the first Canon DSLR that

can continuously autofocus when recording movies. Sound is important to the shooting of movies, and the Rebel T4i/EOS 650D is equipped with a stereo microphone (a first for the Rebel series) as well as a jack to plug in an external microphone. The Rebel T4i/EOS 650D is also the first Canon DSLR to feature a touch-sensitive LCD. Virtually all of the camera's operations can be set using the 3in. (7.7cm) LCD rather than using the physical buttons on the camera body. This includes setting menu functions, selecting the focus point in Live View and even firing the shutter once focus has been locked. To make the use of the LCD easier, the panel is hinged and can be set in a variety of positions allowing the camera to be used overhead or down low, close to the ground, more easily.

An Easy Guide to the Best Features John Wiley & Sons

The Canon EOS M was released in June 2012 with a mirror-less interchangeable lens following the trend by Panasonic makers four years before. It is compact and easy to use but is capable of producing great

pictures with its 18 megapixels, at a low price and is perfect for persons who are new to digital cameras. It is said to be a smaller version of the previously released Canon EOS 650D but with a much simpler interface as is seen with the lack of a viewfinder, some buttons and dials that were present in earlier models. It has a detailed CMOS sensor and is very precise with high speed.

Volumes in *Writing Spaces: Readings on Writing* offer multiple perspectives on a wide-range of topics about writing, much like the model made famous by Wendy Bishop's "The Subject Is . . ." series. In each chapter, authors present their unique views, insights, and strategies for writing by addressing the undergraduate reader directly. Drawing on their own experiences, these teachers-as-writers invite students to join in the larger conversation about developing nearly every aspect of craft of writing. Consequently, each essay functions as a standalone text that can easily complement other selected readings in writing or writing-intensive courses across the disciplines at any level. Topics in Volume 1 of the series include academic writing, how to interpret writing assignments, motives for writing, rhetorical analysis, revision, invention, writing centers, argumentation, narrative, reflective

writing, Wikipedia, patchwriting, collaboration, and genres.
