From the Introduction: If you think about it, all life drawing and painting is at some point being done from the artist's memory, even if that memory is only a few seconds old. Every time the artist takes their eyes off of the model or scene and looks at their paper or canvas, their visual memory is involved. What if that artist's visual memory was highly trained? That artist might need the model for a shorter period of time, or she might have a more productive time when the model is in pose. He might be better at painting all of the fleeting effects that nature throws at us when we are landscape painting en plein air. Although I encourage you to consistently engage in memory-drawing practice, it should not supplant your regular art exercises. Memory-drawing ought to be done in addition to your regular art training, not instead of it. In a perfect world it would be integrated into traditional arts instruction, but the reality is that you will most likely be training your visual memory on your own. Memory Drawing: Perceptual Training and Recall exists to guide you in doing just that. It will also help you improve your abilities to remember fleeting effects, seize essentials,

and even enhance your imagination.

The book offers a comprehensive approach to the assessment and treatment of disturbances in facial expression, oral movement, swallowing, breathing, voice and speech production caused by developmental and acquired neurological conditions. The principles outlined are used in patients with different etiologies (e.g. stroke, tumors, traumas). F.O.T. T., developed by Kay Coombes, is a hands-on approach based on an understanding of neurological functions and the way we learn from experience. The approach aims to give the patient experience of physiological posture and movement using facial-oral functions in normal activities of daily living (ADL). Rather than mere “ exercises ” , F.O.T.T involves meaningful activities aiming to promote participation, according to ICF criteria. Four main areas are covered: nutrition, oral hygiene, nonverbal communication and speech. Each chapter summarises the problems of severely ill patients and shows the clinical reasoning behind the solutions offered. Separate chapters discuss tracheostomy management

and the training of the carers involved, including relatives. The chapter authors are experienced specialists (physio-, occupational- and speech-language therapists and physicians), whose contributions aim to provide interdisciplinary perspectives and translate latest research into clinical practice.

Dr. Robert Wang developed The Jungian Tarot as a "visual gateway into the complexities of Jungian psychology" to aid in the process of active imagination proposed by Carl Jung. The 22 Major Arcana represent Jungian archetypes of the collective unconscious. The figures are visually presented with archways and circular mandalas, which aid in meditation. The court cards depict family roles: father, mother, daughter and son. The deck is a companion to the Jungian Tarot Trilogy by Robert Wang.

This book explores the significance of silence within and beyond pedagogical contexts. Silence is a

complex and multidimensional phenomenon for everyday life: since schools mirror society, it is also significant in education. While silence can be experienced in a multitude of different ways, the author reflects on whether silence itself can bear a message: is there an aspect of dialogue in silence, or is it a language all of its own? This book examines a variety of silences essential for education, examining such topics as silence and aspects of power, silent students, and the relationship between listening and silence. Drawing on a range of empirical data, the author elucidates the significance of silence in pedagogical contexts.

Leading thinkers from a range of disciplines discuss the compatibility of power and care, in conversation with the Dalai Lama. For more than thirty years, the Dalai Lama has been in dialogue with thinkers from a range of disciplines, helping to support pathways for knowledge to increase human wellbeing and compassion. These conversations, which began as private meetings, are now part of the Mind & Life Institute and Mind & Life Europe. This book documents a recent Mind & Life Institute dialogue with the Dalai Lama and others on two fundamental forces: power and care—power over and care for others in human societies. The notion of power is essentially neutral; power can be used to benefit others or to harm them, to build or to destroy. Care, on the other hand, is not a neutral force; it aims at increasing the wellbeing of others. Power and care are not incompatible: power, imbued with care, can achieve more than a powerless motivation to care; power, without the intention to benefit others, can be ruthless. The contributors—who include such celebrated figures as Frans B. M. de Waal, Olafur Eliasson, Sarah Blaffer Hrdy, and Jody Williams—discuss topics including the

interaction of power and care among our closest relatives, the chimpanzees; the effect of meditation and mental training practices on the brain; the role of religion in promoting peace and compassion; and the new field of Caring Economics.

Contributors Paul Collier, Brother Thierry-Marie Courau, Frans B. M. de Waal, Olafur Eliasson, Scilla Elworthy, Alexandra M. Freund, Tenzin Gyatso (His Holiness the Dalai Lama), Markus Heinrichs, Sarah Blaffer Hrdy, Frédéric Laloux, Alaa Murabit, Matthieu Ricard, Johan Rockström, Richard Schwartz, Tania Singer, Dennis J.
