A major theme throughout is that what teachers choose to teach and the way they teach reflect their broader understanding of society, history, and the purpose of social studies education. Advocating an inquiry and activity-based view of social studies teaching that respects the points of view of students and teachers, and based in practice and experience, it offers systematic support and open, honest advice for new teachers. Each chapter addresses a broad question about social studies education; sub-chapters begin with narrower questions that direct attention to specific educational issues. Lesson ideas and materials in

the book and online are especially designed to help new teachers to address common core learning standards, to work in inclusive settings, and to promote literacy and the use of technology in social studies classrooms. Chapters include highlighted Learning Activities, Teaching Activities, and Classroom Activities designed to provoke discussion and illustrate different approaches to teaching social studies, and conclude with recommendations for further reading and links to on-line essays about related social studies topics. Activities are followed by four categories: "Think it over," "Add your voice to the discussion," "Try it yourself," and "It ' s your classroom." All of these are supported with online teaching material. Designed for undergraduate and graduate pre-service social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice. New in the Fourth Edition Provides a number of new lesson ideas paired with online lesson plans and activity sheets in every chapter Takes a new focus on data-driven, standards-based instruction, especially in relation to the common core curriculum Addresses the interactive nature of learning in updated technology sections Reflects current trends in history education Includes more of what the author has learned from working teachers Offers a wealth of additional on-line material linked to the text Cheetahs of the Serengeti Plains Independently Published

This book explores the significance of silence within and beyond pedagogical contexts. Silence is a complex and multidimensional phenomenon for everyday life: since schools mirror society, it is also significant in education. While silence can be experienced in a multitude of

different ways, the author reflects on whether silence itself can bear a message: is there an aspect of dialogue in silence, or is it a language all of its own? This book examines a variety of silences essential for education, examining such topics as silence and aspects of power, silent students, and the relationship between listening and silence. Drawing on a range of empirical data, the author elucidates the significance of silence in pedagogical contexts.

The readings featured in this volume are compiled from the authors' previously published papers and chapters, as well as newly written materials. At a more advanced level, the readings address certain specialized topics. However, these readings are thematically consistent with the chapters in the companion volume, making them especially suitable as supplementary material. Together with its companion volume, it provides an integrated and coherent account of how to study behavior. Most topics treated in traditional research methods texts are covered in detail, with particular reference to behavior as a subject matter. However, the work is distinctive from other texts in that its topics are organized not around inferential statistical methods, but the needs of a behavioral subject matter and the goal of bringing the researcher's behavior under its control. This approach closely integrates each new chapter with previous chapters,

and the result is especially intuitive for students.

The work on this book started in March 2020 with an archive of pictures acquired from previous Mountain School of Arts students, staff and faculty. The collection consists of around 2000 images taken over the last 15 years. Most of the photographs were shot with older digital or phone cameras with the addition of some analog footnotes. We consider the photographs to be documents of the many different shapes, forms and people that have taken part in the Mountain School of Arts program since its inception in 2005.

Grasses and Forage Plants, by J.B. Killebrew; 1899 Springer Nature

Over the last 30 years the African wild dog population has declined dramatically. Dogs have disappeared from 25 of the 39 countries where they were previously found, and only 6 populations are believed to number more than 100. Today it is believed that only between 3,000-5,500 dogs remain in 600-1,000 packs with most to be found in eastern and southern Africa. The dramatic reduction

in their population is attributed to a number of factors including human population growth and activities, deterioration of habitat, and contact with domestic dogs and their diseases. This Action Plan explores some of the reasons behind their disappearance and provides a number of proposed solutions split into 3 priority areas, ranging from habitat management and conservation to monitoring domestic dogs.
