Aunt Jen Morgan Kaufmann

This volume brings together a range of case studies into the phenomenon of return migration to the Caribbean,

focusing on topics such as the socio-cultural adjustments faced by transnational migrants, the extent to which they are 'othered', and the gendered character of their experiences on return.

An Introduction to Communication Studies BRILL

The future of the university as an open knowledge institution that institutionalizes diversity and contributes to a common resource of knowledge: a manifesto. In this book, a diverse group of authors—including open access pioneers, science communicators, scholars, researchers, and university administrators—offer a bold proposition: universities should become open knowledge institutions, acting with principles of openness at their center and working across boundaries and with broad communities to generate shared knowledge resources for the benefit of humanity. Calling on universities to adopt transparent protocols for the creation, use, and governance of these resources, the authors draw on cutting-edge theoretical work, offer real-world case studies, and outline ways to assess universities' attempts to achieve openness. Digital technologies have already brought about dramatic changes in knowledge format and accessibility. The book describes further shifts that open knowledge institutions must make as they move away from closed processes for verifying expert knowledge and toward careful, mediated approaches to sharing it with wider publics. It examines these changes in terms of diversity, coordination, and communication; discusses policy principles that lay out paths for universities to become fully fledged open knowledge institutions; and suggests ways that openness can be introduced into existing rankings and metrics. Case studies—including Wikipedia, the Library Publishing Coalition, Creative Commons, and Open and Library Access—illustrate key processes.

CAPE Communication Studies Pearson

Two new titles that provide comprehensive coverage of the syllabus. Units 1 and 2 of Biology for CAPE® Examinations provide a comprehensive coverage of the CAPE® Biology syllabus. Written by highly experienced, internationally bestselling authors Mary and Geoff Jones and CAPE® Biology teacher and examiner Myda Ramesar, both books are in full colour and written in an accessible style. Learning objectives are presented at the beginning of each chapter, and to assist students preparing for the examination, each chapter is followed by questions in the style they will encounter on their examination papers.

Information Technology and Computer Science for Cape and College Students Cambridge University Press
Winner of the 2002 Outstanding Book Award presented by the International and Intercultural Communication Division of the National Communication Association
The election of 1994, which heralded the demise of Apartheid as a legally enforced institutionalization of "whiteness," disconnected the prior moorings of social identity for most South Africans, whatever their political persuasion. In one of the most profound collective psychological experiences of the contemporary world, South Africans are renegotiating the meaning of their social positionalities. In this book, Melissa Steyn, herself a white South African, grapples with what it means to be white, reflecting on events in her past that still resonate with her today. Her research includes discourse with more than fifty white South Africans who are faced with reinterpreting their old selves in the light of new knowledge and possibilities. Framed within current debates of

postcolonialism and postmodernism, "Whiteness Just Isn't What It Used To Be" explores how the changes in South Africa's social and political structure are changing the white population's identity and sense of self.

The 'Development Communication Sourcebook' highlights how the scope and application of communication in the development context are broadening to include a more dialogic approach. This approach facilitates assessment of risks and opportunities, prevents problems and conflicts, and enhances the results and sustainability of projects when implemented at the very beginning of an initiative. The book presents basic concepts and explains key challenges faced in daily practice. Each of the four modules is self-contained, with examples, toolboxes, and more.

CAPE Management of Business Bloomsbury Academic

A range of resources for CAPE has been specially developed to meet the requirements of the CAPE syllabus. This new textbook has been developed to match the requirements of the CAPE Management of Business syllabus. Full coverage of the CAPE syllabus is provided and the content has a clear focus on the Caribbean economic and business environment. Management of Business for CAPE includes case studies from a variety of countries and industries, as well as an internal assessment component.

Class Cengage Learning

This text is a programming tutorial on the fundamentals and features of ASN.1. It explains ASN.1 and its encoding rules in simple terms and addresses the subject at an introductory as well as at a more detailed level.

I Love Jesus, But I Want to Die WaterBrook

There have been many great and enduring works of literature by Caribbean authors over the last century. The Caribbean Contemporary Classics collection celebrates these deep and vibrant stories, overflowing with life and acute observations about society. Written as a series of letters from the child Sunshine to her absent mother, Aunt Jen traces the changing attitudes of a child entering adulthood as she tries to understand the truth behind her mother's departure, and make sense of her relationship with her family. Aunt Jen migrated to England as part of the Windrush generation, and Sunshine's letters, written in the early 1970s, reveal something of the emotional as well as the physical gulf between those who left and those who remained behind. A companion novel to Letters Home, Aunt Jen is a painfully one-sided correspondence, revealing the complex inheritance we pass on to our children. Suitable for readers aged 14 and above.

Communicating in Small Groups State University of New York Press

In this introductory textbook, the author contextualises approaches and theories on communication studies by making use of local examples from the mass media, as well as relevant political and social experiences. The book is divided into two parts. The first provides students with a strong foundation in communication while the second focuses on the areas of specialisation within communication studies. Each chapter starts with the learning Outcomes and a short overview of the chapter. Students can monitor their learning by using the summaries and 'test yourself' questions at the end of every

chapter. Scenarios provide examples of how the theory can be applied in practice. This makes for a learner-friendly and accessible book which will prove invaluable to Students and professionals alike. Beginner students majoring in Communication Studies, as well as those studying towards various degrees or qualifications where communication is a prerequisite will find this book useful.

The Caribbean People iUniverse

The impact of transformational leadership styles, management strategies, and communication for organizational effectiveness and employee performance within organizations cannot be overemphasized. Leadership as a concept has evolved over the years based on situations, practices, and change management approaches in organizations. The evolution of transformational leadership in organizations is imperative to examine in order to motivate and encourage others to collectively support and work to achieve organizational effectiveness or vision and mission. Leadership needs a paradigm shift to influence opportunities and challenges in organizations such as organizational behavior, motivation, communication, and management functions.

Transformational Leadership Styles, Management Strategies, and Communication for Global Leaders aims to provide relevant theoretical, conceptual/procedural, and the latest empirical research findings frameworks that critically examine the areas of leadership, leadership styles, management studies, and communication for leaders globally. It is designed for multi-sectoral interests in business and educational organizations, chief executive officers, executive members, team leaders, industry leaders, human resource directors/personnel, leadership and management leaders, and practitioners.

Beyond the Legacy of the Missionaries and East Indians MIT Press

An introductory treatment of communication theory as applied to the transmission of information-bearing signals with attention given to both analog and digital communications. Chapter 1 reviews basic concepts. Chapters 2 through 4 pertain to the characterization of signals and systems. Chapters 5 through 7 are concerned with transmission of message signals over communication channels. Chapters 8 through 10 deal with noise in analog and digital communications. Each chapter (except chapter 1) begins with introductory remarks and ends with a problem set. Treatment is self-contained with numerous worked-out examples to support the theory. · Fourier Analysis · Filtering

and Signal Distortion · Spectral Density and Correlation · Digital Coding of Analog Waveforms · Intersymbol Interference and Its Cures · Modulation Techniques · Probability Theory and Random Processes · Noise in Analog Modulation · Optimum Receivers for Data Communication

Semantics World Bank Publications

The Media Book provides today's students with a comprehensive foundation for the study of the modern media. It has been systematically compiled to map the field in a way which corresponds to the curricular organization of the field around the globe, providing a complete resource for students in their third year to graduate level courses in the U.S.

An Introduction To Analog And Digital Communications

Sourcebooks, Inc.

Books on intercultural communication are rarely written with an intercultural readership in mind. In contrast, this multinational team of authors has put together an introduction to communicating across cultures that uses examples and case studies from around the world. The book further covers essential new topics, including international conflict, social networking, migration, and the effects technology and mass media play in the globalization of communication. Written to be accessible for international students too, this text situates communication theory in a truly global perspective. Each chapter brings to life the links between theory and practice and between the global and the local, introducing key theories and their practical applications. Along the way, you will be supported with first-rate learning resources, including: • theory corners with concise, boxed-out digests of key theoretical concepts • case illustrations putting the main points of each chapter into context • learning objectives, discussion questions, key terms and further reading

framing each chapter and stimulating further discussion • a companion website containing resources for instructors, including multiple choice questions, presentation slides, exercises and activities, and teaching notes. This book will not merely guide you to success in your studies, but will teach you to become a more critical consumer of information and understand the influence of your own culture on how you view yourself and others.

Collins Secondary Social Sciences for the Caribbean - Student's IGI Global

Modern science communication has emerged in the twentieth century as a field of study, a body of practice and a profession—and it is a practice with deep historical roots. We have seen the birth of interactive science centres, the first university actions in teaching and conducting research, and a sharp growth in employment of science communicators. This collection charts the emergence of modern science communication across the world. This is the first volume to map investment around the globe in science centres, university courses and research, publications and conferences as well as tell the national stories of science communication. How did it all begin? How has development varied from one country to another? What motivated governments, institutions and people to see science communication as an answer to questions of the social place of science? Communicating Science describes the pathways followed by 39 different countries. All continents and many cultures are represented. For some countries, this is the first time that their science communication story has been told.
