Capital Gains and Losses – 10 Helpful Facts to Know ...
In financial parleys, capital gain generally refers to realised capital gain. Capital loss is the reverse of capital gain, i.e. it results in a loss when the investment is sold. In simple terms, the difference between the selling price and cost/purchase price of an investment can be described as capital gain/loss.

SOLUTIONS TO ASSIGNMENT PROBLEMS

Usually, allowable capital losses are set against chargeable gains, reducing the amount of the gain. The only exception to this is where a loss has been made on unquoted shares, in which case the loss may be able to be set against income. See the Losses on shares set against income guidance note for details of the conditions which must be met.

Use of capital losses | Tax Guidance | Tolley

A gain is calculated by the total gain in the year less any allowable losses in the period less any allowable losses brought forward. A capital loss in a year can be used against other current year capital gains. Any unrelieved capital losses are carried forward

and set against chargeable gains in the future.
