common to both Houses are included in v. 2, etc. The academy Disha Publications Giants, cannibals and other monsters were a regular feature of Renaissance illustrated maps, inhabiting the Americas alongside other indigenous peoples. In a new approach to views of distant peoples, Surekha Davies analyzes this archive alongside prints, costume books and geographical writing. Using sources from Iberia, France, the German lands, the Low Countries, Italy and England, Davies argues that mapmakers and viewers saw these maps as careful syntheses that enabled viewers to compare different peoples. In an age when scholars, missionaries, native peoples and colonial officials debated whether New World inhabitants could – or should – be converted or enslaved, maps were uniquely suited for assessing the impact of environment on bodies and temperaments. Through innovative interdisciplinary methods connecting the European Renaissance to the Atlantic world, Davies uses new sources and questions to explore science as a visual

pursuit, revealing how debates about the relationship between humans and monstrous peoples challenged colonial expansion.

This is the world ' s first astrological (Vedic Jyotish) book which is based on scientific evaluation and validation. The interpretations are based on rationale and logic. Your and other people ' s robotic behavior stems from a pre-programmed chip, which is embedded in your mystic glands inside the brain. This chip controls the inherent behavior of a person. The information about this coded chip is available in your kundali (astrological chart). Shani (Saturn): a new revolutionary understanding Shani is like a GPS with an in-built navigation system. A retrograde

(R) or debilitated (D) Shani is like a GPS, which is malfunctioning. Obviously, you land up at wrong places, at wrong timings, thus wasting your life ' s energy reaching nowhere. This creates frustration, sadness, depression, and mental agony. Self-pity makes you wail in a well of despair, you wallowing, " my fate! "

A Dictionary of Universal Information, Comprising a Complete Summary of the Moral, Mathematical, Physical, and Natural Sciences, a Plain Description of the Arts, and Interesting Synopsis of Literary Knowledge, with the Pronunciation and Etymology of Every Leading Term Notion Press

The Milestones series conforms to CBSE's CCE scheme, strictly adhering to the NCERT syllabus. The text is crisp, easy to understand, interactive, informative and activity-based. The series motivates young minds to question, analyse, discuss and think logically.

Beeton's Science, Art, and Literature

Many countries are increasingly threatened by major landslide disasters and fatalities due to extreme weather events which have major implications for public safety and the sustainability of infrastructure and the built environment. A further increase in such a trend could come from

climate change. This book helps to fill in the gap due to the fact that landslide hazards are commonly not covered under the policy debate on climate change. The book highlights the importance of raising awareness to the challenges of landslide hazards due to climate impact. It provides a holistic frame for understanding the key issues and new tools that could be used to assess and manage the landslide risks. The book gathers contributions from 21 countries and regions in the form of national reports or summaries with respect to four key aspects: a) the methods used for evaluating changing weather and changing landslide patterns; b) the changing weather patterns; c) the changing landslide patterns and hazard scenarios; d) the applications to risk management and the formulation of adaptation measures.

Recommendations are made for enhanced preparedness and resilience. Improved crisis management and areas for future work are suggested.
