In this revealing  
comparative study, Mark

Findlay examines the  
problematic nexus  
between undervalued  
labour and vulnerable  
migration status in dis-  
embedded markets. It  
highlights the frustrations  
raised by timeless  
regulatory failure and the  
chronic complicity of  
private property  
arrangements in  
delivering unsustainable

---

market engagement. Mark Legal Regulation offers an insightful, critical analysis of crucial contemporary issues facing social administrators, lawyers and policy makers by repositioning regulatory and policy makers working in the fields of migration, labour law and regulation. Its broad disciplinary coverage lends itself to students of law and regulation who will benefit from this unique evaluation of private property, labour relations and migration exclusivity.

Findlay identifies the challenge for normative and functional foundations of equitable governance, by repositioning regulatory and policy makers working in the fields of migration, labour law and regulation. Its broad disciplinary coverage lends itself to students of law and regulation who will benefit from this unique evaluation of private property, labour relations and migration exclusivity.

The accountability of property through wider access and inclusion, it is argued, grounds commodified occupation as a vitally valuable social bond in which workers are empowered to participate rather than suffer exploitation. The comparative analysis of the EU and ASEAN regulatory contexts reveals that it is not simply more regulatory activity, but rather its reversion from market interests to human values, which will advance sustainability. Property, Labour and

The Politics of Ecosocialism  
Prabhat Prakashan  
An urgent and timely story of the contentious politics of incorporating environmental justice into global climate change policy. Although the science of climate change is clear, policy decisions about how to respond to its effects

---

remain contentious. Even when such decisions claim to be guided by objective knowledge, they are made and implemented through political institutions and relationships—and all the competing interests and power struggles that this implies. Michael Méndez tells a timely story of people, place, and power in the context of climate change and inequality. He explores the perspectives and influence low † ‘ income people of color bring to their advocacy work on climate change. In California, activist groups have galvanized behind issues such as air pollution, poverty alleviation, and green jobs to advance equitable climate solutions at the local, state, and global levels. Arguing that environmental protection and improving

public health are inextricably linked, Mendez contends that we must incorporate local knowledge, culture, and history into policymaking to fully address the global complexities of climate change and the real threats facing our local communities.

**City Unsilenced** Rand Corporation

This handbook is a comprehensive and up to date work of reference that offers a survey of the state of financial geography. With Brexit, a global recession triggered by the COVID-19 pandemic, as well as new financial technology threatening and promising to revolutionize finance, the map of the financial world is in a state of transformation, with major implications for development. With these developments in the background, this handbook builds on this unprecedented

---

momentum and responds to these epochal challenges, offering a comprehensive guide to financial geography. Financial geography is concerned with the study of money and finance in space and time, and their impacts on economy, society and nature. The book consists of 29 chapters organized in six sections: theoretical perspectives on financial geography, financial assets and markets, investors, intermediation, regulation and governance, and finance, development and the environment. Each chapter provides a balanced overview of current knowledge, identifying issues and discussing relevant debates. Written in an analytical and engaging style by authors based on six continents from a wide range of disciplines, the work also offers reflections on where the research agenda is likely to advance in the future.

The book's key audience will primarily be students and researchers in geography, urban studies, global studies and planning, more or less familiar with financial geography, who seek access to a state-of-the art survey of this area. It will also be useful for students and researchers in other disciplines, such as finance and economics, history, sociology, anthropology, politics, business studies, environmental studies and other social sciences, who seek convenient access to financial geography as a new and relatively unfamiliar area. Finally, it will be a valuable resource for practitioners in the public and private sector, including business consultants and policy-makers, who look for alternative approaches to understanding money and finance.

This book, which is the first to be published in the emerging field of farm-level microsimulation, highlights the different methodological components of microsimulation modelling: hypothetical, static, dynamic, behavioural, spatial and macro-micro. The author applies various microsimulation-based methodological tools to farms in a consistent manner and, supported by a set of Stata codes, undertakes analysis of a wide range of farming systems from OECD countries. To these case studies, O'Donoghue incorporates farming policies such as CAP income support payments, agri-environmental schemes,

---

forestry planting incentives and biomass incentives - in doing so, he illuminates the merits of microsimulation in this environment.

*Property, Labour and Legal Regulation*

The success of counterterrorism finance strategies in reducing terrorist access to official currencies has raised concerns that terrorist organizations might increase their use of such digital cryptocurrencies as Bitcoin to support their activities. RAND researchers thus consider the needs of terrorist groups and the advantages and disadvantages of the cryptocurrency

technologies available to them.

**Identity and Disguise in Fact and Fiction** Taylor & Francis

This one family's journey across the unsettled West demonstrates how its understandings of family identity and selfhood were fostered. Beginning in the late 1880s, each member's perspective of the past and the future evolved as they moved from the Midwest to the West and finally settled in various regions of the United States. This chronicle of a family movement and cultural assimilation contains

---

an ideology of America that often frames stories told about family and history."

Geography, globalisation and governance Bloomsbury Publishing

A comprehensive update, the fourth edition of this leading text features numerous chapters by new authors addressing the latest trends and topics in the field. The book presents the foundational concepts and methodological tools that readers need in order to engage with today's pressing urban transportation policy issues. Coverage encompasses passenger and freight dynamics in the American metropolis; the local and regional transportation

planning process; and questions related to public transit, land use, social equity and environmental justice, energy consumption, air pollution, transportation finance, sustainability, and more. Among the student-friendly features are special-topic boxes delving into key issues and 87 instructive figures, including eight color plates. New to This Edition \*Extensively revised coverage of information and communication technologies, urban freight, travel behaviors, and regional transportation planning. \*Engaging discussions of current topics: smartphone travel tracking, Uber, car and bike sharing, food deserts,

---

biofuels, and more.

\*Heightened focus on climate change.

\*Reflects over a decade of policy changes, technological advances, and emergent ideas and findings in the field. \*Most of the figures and special-topic boxes are new.

of cultural and economic mythology where representations of food and consumption become the commonsense of cultural difference and economic success.

**The UK Regional-National Economic Problem** Cengage

Learning

Landmark Cases in Public Law answers the need for an historical examination of the leading cases in this field, an examination which is largely absent from the standard textbooks and journal articles of the day. Adopting a contextualised historical approach, this collection of essays by leading specialists in the

field provides both an explanation of the importance and impact of the chosen decisions, as well as doctrinal analysis.

This approach enables each author to throw light on the driving forces behind the judicial outcomes, and shows how the final reasoning of the court was ultimately as much dependent upon such human factors as the attitudes, conduct, and personalities of the parties, their witnesses, their counsel, and the judges, as the drive to seek legal realignment with the political developments that were widely perceived to be taking place. In this way, this

---

form of analysis provides an exposition of the true stories behind these landmark cases in public law.

**An American Geography: One Family's Journey** UCL Press

Transformation to a low carbon economy is a central tenet to any discussion on the solutions to the complex challenges of climate change and energy security. Despite advances in policy, carbon management and continuing development of clean technology, fundamental business transformation has not occurred because of multiple political, economic, social and

organisational issues. Carbon Governance, Climate Change and Business Transformation is based on leading academic and industry input, and three international workshops focused on low carbon transformation in leading climate policy jurisdictions (Canada, USA and the UK) under the international Carbon Governance Project (CGP) banner. The book pulls insights from this innovative collaborative network to identify the policy combinations needed to create transformative change. It explores fundamental questions about how governments and the private

---

sector conceptualize the problem of climate change, the conditions under which business transformation can genuinely take place and key policy and business innovations needed. Broadly, the book is based on emerging theories of multi-levelled, multi-actor carbon governance, and applies these ideas to the real world implications for tackling climate change through business transformation. Conceptually and empirically, this book stimulates both academic discussion and practical business models for low carbon transformation.

Technical and Organizational Barriers and Future Threats CQ Press  
Asia is regarded as the fastest growing area for international and domestic tourism in the world today and over the next 20 years. Given the economic, social and environmental importance of tourism in the region, there is a need for a comprehensive and readable overview of the critical debates and controversies in tourism in the region and the major factors that are affecting tourism development both now and in the foreseeable future. This Handbook provides a contemporary survey of the region and its continued growth and development as a key destination and generator of tourism,

---

which is marked by a high proportion of intra-regional travel. The book is divided into five sections. This first section provides an introduction to the region and context to the nationally focused chapters. The next three sections are then broadly based on the three UNWTO Asian regions: South-East Asia, South and Central Asia, and East and North-East Asia, providing readers with a valuable snapshot of tourism at various scales, and from various approaches and positions. The concluding section considers future prospects for tourism in Asia. The handbook is interdisciplinary in coverage and is also international in scope through its authorship and

content. It presents a range of perspectives and understanding of the processes and forces that are shaping tourism in this fascinating and dynamic region that is one of the focal points of global tourism. This is essential reading for students, researchers and academics interested in tourism in the growth region of Asia now and in the future.

Reforming Water Law and Governance

Guilford Publications  
Central Peripheries  
explores post-Soviet Central Asia through the prism of nation-building. Although relative latecomers on the international scene, the Central Asian states see themselves as globalized, and yet in spite of - or perhaps

---

precisely because of - past has influenced the this, they hold a very construction of classical vision of national storylines, the nation-state, as well as the rejecting the diversity of each abolition of state's narratives and boundaries and the use of symbolic theory of the 'death politics. Exploring of the nation'. Their state discourses, unabashed celebration academic narratives of very classical and different forms of nationhoods built on popular nationalist post-modern premises storytelling allows challenges the Western Laruelle to depict the view of nationalism as complex construction a dying ideology that of the national ought to have been pantheon in the three transcended by post- decades since national independence. The cosmopolitanism. second half of the Marlene Laruelle looks book focuses on at how states in the Kazakhstan as the most region have been hybrid national navigating the construction and a unique case study of construction of a nationhood in Eurasia. nation in a post- Based on the principle imperial context where that only Russia remains the multidisciplinary dominant power and can help us to cultural reference. untangle the puzzle of She takes into nationhood, Central consideration the ways Peripheries uses mixed in which the Soviet

---

methods, combining political science, intellectual history, sociology and cultural anthropology. It is inspired by two decades of fieldwork in the region and a deep knowledge of the region's academia and political environment. Praise for Central Peripheries 'Marlene Laruelle paves the way to the more focused and necessary outlook on Central Asia, a region that is not a periphery but a central space for emerging conceptual debates and complexities. Above all, the book is a product of Laruelle's trademark excellence in balancing empirical depth with vigorous theoretical advancements.' - Diana T. Kudaibergenova, University of Cambridge 'Using the

concept of hybridity, Laruelle explores the multitude of historical, political and geopolitical factors that predetermine different ways of looking at nations and various configurations of nation-building in post-Soviet Central Asia. Those manifold contexts present a general picture of the transformation that the former southern periphery of the USSR has been going through in the past decades.'

*Transformation* Edward Progressive-era Elgar Publishing reform movements. Red Bird, Red Power Lewandowski draws on tells the story of a vast array of one of the most sources, including influential—and controversial—American previously unpublished letters and diaries, to Indian activists of recount Zitkala-Ša's the twentieth unique life journey. century. Zitkala-Ša (1876–1938), also Her story begins on known as Gertrude the Dakota plains, Simmons Bonnin, was where she was born to a highly gifted a Yankton Sioux writer, editor, and mother and a white musician who father. Zitkala-Ša, dedicated her life whose name translates to achieving justice as "Red Bird" in for Native peoples. English, left home at Here, Tadeusz age eight to attend a Lewandowski offers Quaker boarding the first full-scale school, eventually biography of the working as a teacher woman whose at Carlisle Indian passionate Industrial School. By commitment to her early twenties, improving the lives she was the toast of of her people East Coast literary propelled her to the society. Her short forefront of stories for the

---

Atlantic Monthly (1900) are, to this day, the focus of scholarly analysis and debate. In collaboration with William F. Hanson, she wrote the libretto and songs for the innovative Sun Dance Opera (1913). And yet, as Lewandowski demonstrates, Zitkala-Ša's successes could not fill the void of her lost cultural heritage, nor dampen her fury toward the Euro-American establishment that had robbed her people of their land. In 1926, she founded the National Council of American Indians with the aim of redressing American Indian grievances. Zitkala-Ša's complex identity has made her an intriguing—if elusive—subject for scholars. In Lewandowski's sensitive interpretation, she emerges as a multifaceted human being whose work entailed constant negotiation. In the end, Lewandowski argues, Zitkala-Ša's achievements distinguish her as a forerunner of the Red Power movement and an important agent of change.

Official Gazette of the United States Patent and Trademark Office Springer

Who controls what we eat? This book reveals how dominant corporations, from the supermarket to the seed industry,

---

exert control over contemporary food systems. It analyzes the strategies these firms are using to reshape society in order to further increase their power, particularly in terms of their bearing upon the more vulnerable sections of society, such as recent immigrants, ethnic minorities and those of lower socioeconomic status. Yet this study also shows that these trends are not inevitable. Opposed by numerous efforts, from microbreweries to seed saving networks, it explores how opposition to this has encouraged even the most powerful firms to make small but positive changes. This revised edition has been updated to reflect recent developments in the food system, as well as the broad political economic forces that shape them. It also examines the rapidly changing technologies, such as Big Data and automation, which have the potential to reinforce, as well as to challenge, the power of the largest firms.

*The Athenaeum*  
Routledge  
Successive Enlargements to the European Union membership have transformed it into an economically, politically and culturally heterogeneous body

---

with distinct vulnerabilities in its multi-level governance. This book analyses core-periphery relations to highlight the growing cleavage, and potential conflict, between the core and peripheral member-states of the Union in the face of the devastating consequences of Eurozone crisis. Taking a comparative and theoretical approach and using a variety of case studies, it examines how the crisis has both exacerbated tensions in centre-periphery relations within and outside the Eurozone, and how the European Union's economic and political status is declining globally. This text will be of key interest to students

and scholars of European Union studies, European integration, political economy, public policy, and comparative politics.

**The Geography of Urban**

**Transportation, Fourth Edition**

Routledge

Produced in partnership with the National Geographic Society, this remarkable book helps you master the basic tenets of world geography while exploring established and emerging tourist destinations worldwide. The book begins with an overview of geographic concepts and an introduction to the global tourism industry,

---

including the perspective of both hosts and guests. World destinations are covered in twelve sections divided into short, easy-to-digest chapters, each presenting regional geographic information and physical, cultural, and touristic details specific to individual countries and locations. Each destination features a flag, National Geographic map, descriptive introduction from the National Geographic Atlas of the World, key facts and data, travel and cultural tips, and information on significant tourist destinations and attractions. Each section contains

National Geographic articles in the features "Insider Info," "Through the Visitor's Eyes," "City Highlights," and "Preserving the Future." In addition to extensive updates to reflect the latest trends and developments in world tourism, the Fifth Edition now features a vibrant, full-color design. Ideal for avid travelers and aspiring hospitality, travel, and tourism professionals, NATIONAL GEOGRAPHIC LEARNING'S VISUAL GEOGRAPHY OF TRAVEL AND TOURISM, Fifth Edition, is an engaging and informative guide to the world's varied and appealing destinations.

*Nationhood in Central Asia*  
Routledge

This book identifies the most effective water policy tools and innovations, and the circumstances that foster their successful implementation by taking a comparative look at a world-leading 'laboratory' of water law and governance: Australia. In particular, the book analyses Australia's 20-year experience implementing a hybrid governance system of markets, hierarchical regulation, and collaborative integrated water planning. Australia is acknowledged as a world leader in water governance reform, and an examination of its relatively mature water law and governance system has great significance for many international academics and jurisdictions. This book synthesises practical lessons and theoretical insights from Australia, as well

---

as recommendations from comparative analysis with countries such as the United States to provide useful guidance for policymakers and scholars seeking to apply water instruments in a wide range of policy contexts. The book also advances our understanding of water and broader environmental governance theory and is a valuable reference for scholars, researchers and students working in law, regulation and governance studies – especially in the field of water and environmental law.

Chapter "Lessons from Australian water reforms: Indigenous and environmental values in market-based water regulation" is available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com](https://link.springer.com).
