Asked by Steve Chamberlain. Two weeks ago the engine light in my 2010 Holden Captiva came on and stayed on. I bought it last October and took it back to the used car dealer I bought it from to get it fixed. They plugged a computer in to it and reset it. The guy said it should be ok now, and that it was probably caused by a bad batch of petrol, but it came on again.

Here are some of the most typical problems that can make your Captiva's reduced engine power warning come on: Throttle Body. This is one of the most common reasons the reduced engine power light comes on. If the ECU isn't getting the proper voltage response from the throttle body, it can't be sure of how much it'll really accelerate your Captiva from the gas pedal input. At this point, it turns on the reduced engine power mode in order to keep the vehicle from running away from you ...
