5 Ways Modern Car Engines Differ from Older Car Engines ...
Before we talk about how modern car engines are different from older ones, you need to understand the basics of how a car engine works. Basically, gasoline and air are ignited in a chamber called a cylinder. In the cylinder is a piston that gets moved up and down by the gasoline/air explosion.

But 3D Cars do not come bundled with your 3D Modeling|Rendering Software. Therefore you either have to model them, or purchase them online. 3D Artists can spend a day just to come up with a decently modeled and textured 3D Car. This is exactly why 3D Car Models sold online come with a hefty price tag.

You can't just say you'll model the engine separately from the car because a car without an engine might be a whole different animal. A car without an engine is nothing like a trailer, which also doesn't have an engine but never will either. In these cases neither 'is-a' nor 'has-a' fits in the concrete way we build objects.
