Only A Real Gearhead Can Name All These Car Parts, Can You?

This car had a 7.0-liter V8 engine that delivered 756 horsepower and could be driven on the track; yet, was also street-legal. This was a seriously upgraded car from those that came off the assembly line. It was a lot of fun in those days, to take a regular car and then “ soup ” it up for better performance. Question 7

Car Quizzes | Test Your Automotive Knowledge with a Car Quiz

How savvy are you about how your car engine works? Take this quiz to find out! Many people know very little about how their car engine works. Other than the benefit of turning the key and pushing on the gas and making the vehicle go vroom, most of us are blissfully ignorant about what makes things work under the hood (until the check engine light comes on, of course).

Rebuilt Engines & Remanufactured Engines by Powertrain ...

Well, if you know your wrist pins from your crank pins, this quiz is for you. If you ' re the one that friends and relatives call for help every time their cars' engines make funny noises, you ought to breeze through these 35 questions quicker than a Dodge Hemi V8 goes through a gallon of gas. Now, even though piston engines work pretty much the same as they did 100 years ago, much has changed over the decades.

Chevy Quiz | Try our Chevrolet Car Trivia Game!

Yes, we are talking about your car's engine. Thanks to the invention of the internal combustion engine in the 1800s, we can go just about wherever we want these days. But a car engine is a very complex piece of machinery, far more so than those early engines.

Know Your Muscle Cars? Score Over 80%! | TheQuiz

Engines are the core reasons why most mechanical machines get to function, they change one form of energy into mechanical energy. As an engineering student, you should be well informed of the different parts of an engine, their importance and how to ensure they are working properly. Take up the test below and see how well you understand basic engine parts.

Car Engine Quiz! | Zoo

Although the primary power source for a car is, of course, the engine itself, cars also need one of these in order to store power when the engine isn't running. The stored power is then used to run the electrical systems in the car, including the starter (which is the part that starts the engine, in case you didn't know!).
