Embodied Minds--technical Environments American Radio Relay League

The book describes the types of radio-control cars from choosing between

pre-built and kits, on-road and off-road, cars and trucks, gas(nitro) and electric power. It then goes on to explain the tips behind building a car, assembly techniques and tools, setting up brakes, suspension and throttle, painting and detailing, applying decals and then leading on to show the best ways of maintaining a car from basic maintenance, checking for wear, adjustments, repairs, replacement parts and cleaning. It also explains how to improve their performance from engine modifications, electronic speed controllers, up-rating motors and batteries, changing chassis and suspension settings, gear ratios and lightweight components for those who want to. Having achieved the building of the car, the book shows driving techniques from how the controls work, cornering, braking, jumping, racing techniques, channel settings for racing with other cars and finally designing and building a track from layout concepts to design and construction suggestions.

To mark the 25th anniversary of Contemporary Ergonomics, the current and past editors have selected 4 papers from each of the years that they oversaw its publication. This collection is intended to showcase the breadth of research topics covered by the Contemporary Ergonomics series of books and to illustrate the change of focus in ergonomics research over the years. The book also contains background information relating to the Annual Conference of the Ergonomics Society for each year, including dates, venues and personnel. The editors also give some insight into the way the format of the conference has had to change to enable the diversity of topics submitted by the ergonomists to be presented effectively.

Car Radio Manual National Geographic Books

The automotive industry underwent great change in the 1960s and the early 1970s. The continuing trend toward market consolidation, the proliferation of sizes and nameplates, and the “ need for speed ” characterized this period, loosely labeled as the muscle car era. This is an exhaustive reference work to American made cars of model years 1960 – 1972. Organized by year (and summarizing the market annually), it provides a yearly update on each make ’ s status and production figures, then details all models offered for that year. Model listings include available body styles, base prices, engine and transmission choices, power ratings, standard equipment, major options and their prices, curb weight and dimensions (interior and exterior), paint color choices, changes from the previous year ’ s model, and sales figures. Also given are assembly plant locations and historical overviews of each model nameplate. The book is profusely illustrated with 1,018 photographs.

ManualRadio Control Car Manual

This book investigates how humans relate to technology in our modern society, and how our basic assumption of human thought and behavior guide our efforts to improve and control technology. This book shows how this dualism is evident and problematic in a wide range of areas, such as investigation of human error in accidents, case studies of innovative interface solutions, simulator training strategies, analysis of work practices in complex systems, and traffic safety research. This book is written for researchers, students and professionals, to supplement the ongoing effort to understand how technology can be integrated with more confidence in modern society.

In-car Entertainment Manual

Driving radio-control cars is an enjoyable hobby and also a competitive sport, but the vast range of different types of models now available can prove confusing for those new to the scene. Radio Control Car Manual starts by providing all the information needed to choose the right model, and goes on to present advice on how to build kits as well as driving techniques, maintenance, modifying, set-up and the various different classes of racing. Essential reading for those contemplating buying their first model and for those already involved in the scene looking to progress to the next level.
