The automotive industry underwent great change in the 1960s and the early 1970s. The continuing trend toward market consolidation, the proliferation of sizes and nameplates, and the "need for speed" characterized this period, loosely labeled as the muscle car era. This is an exhaustive reference work to American made cars of model years 1960-1972.

Organized by year (and summarizing the market

annually), it provides a yearly update on each make's status and production figures, then details all models offered for that year. Model listings include available body styles, base prices, engine and transmission choices, power ratings, standard equipment, major options and their prices, curb weight and dimensions (interior and exterior), paint color choices, changes from the previous year's model, and sales figures. Also given are assembly plant locations and historical overviews of each model nameplate. The book is profusely illustrated with 1,018 photographs. *Toyota Car Radio Service Manual* CRC Press

To mark the 25th anniversary of *Contemporary Ergonomics*, the

current and past editors have selected 4 papers from each of the years that they oversaw its publication. This collection is intended to showcase the breadth of research topics covered by the *Contemporary Ergonomics* series of books and to illustrate the change of focus in ergonomics research over the years. The book also contains background information relating to the Annual Conference of the Ergonomics Society for each year, including dates, venues and personnel. The editors also give some insight into the way the format of the conference has had to change to enable the diversity of topics submitted by the ergonomists to be presented effectively. *The ARRL Operating Manual for Radio*

The book describes the types of radio-control cars from choosing between pre-built and kits, on-road and off-road, cars and trucks, gas(nitro) and electric power. It then goes on to explain the tips behind building a car, assembly techniques and tools, setting up brakes, suspension and throttle, painting and detailing, applying decals and then leading on to show the best ways of maintaining a car from basic maintenance, checking for wear, adjustments, repairs,

replacement parts and cleaning. It also explains how to improve their performance from engine modifications, electronic speed controllers, up-rating motors and batteries, changing chassis and suspension settings, gear ratios and lightweight components for those who want to. Having achieved the building of the car, the book shows driving techniques from how the controls work, cornering, braking, jumping, racing techniques, channel settings for racing with other cars and finally designing and building a track from layout concepts to design and construction suggestions.
