Around 85 children die each year in the UK due to abuse or neglect. A number of these deaths are later deemed preventable because the child involved was known to either social services or to a health professional. Cases such as those of Baby P and Victoria Climbié highlighted the failings of these organisations, ones set up to safeguard children. It is the responsibility of every health professional worldwide to identify and respond to child abuse and yet that very responsibility is both emotionally and strategically challenging. The Child Protection Practice Manual: Training practitioners how to safeguard children equips professionals with the ability to recognise a child at risk and the knowledge of how to work with a child already suffering abuse. Practical advice is offered on how to navigate the multi-disciplinary processes. Fictional case studies and exercises immerse the reader in scenarios. Building on this, the authors lead readers through learning points, recommendations, and legislation. With new definitions in child protection ranging from child sexual exploitation, gang violence, radicalisation and internet bullying through to female genital mutilation, witchcraft and spirit possession, honour based violence and forced marriage, this book will be a valuable resource for qualified paediatricians and those in training, as well as professionals who have contact with children such as GPs, nurses, health visitors, social workers, midwives, teachers, lawyers, and community workers.

It's the undisputed king of Internet auction sites. It's a global bazaar offering a range of goods from Antiques to Zulu Daisies. Cars, clothing, collectibles: you name it, and it's likely that you can find on eBay. But along with the vast selection of goods available, buyers and sellers also encounter all the other elements that markets are known for: tricks and swindlers, overpriced goods, deceptive labeling, small print, recycled items marked as new, and the occasional rare priceless find or undiscovered treasure. Seasoned eBay traders know that to successfully buy and sell within this mega-shopping platform, you need to understand the system. Unfortunately, the secrets of the site are often tightly held by other buyers and sellers seeking a competitive edge. But what if you're a newcomer? Or an experienced trader who wants to make the jump to power buyer or seller? eBay: The Missing Manual gives you the inside information you'll need to become an eBay expert. Buyers will find the most effective ways to find you want and pay prices that are sure to bring a smile to your face. And you'll get authoritative advice on strategic bidding: how to watch for elusive items, time your bids to take the competition by surprise, and--above all--avoid paying more than you ought to. Sellers will get sure-fire tips from eBay veterans who have discovered ways to ramp up their own auctions and sell at the highest possible prices. From the smallest details, such as how to take and post the most effective photos of your goods, to pricing strategies, inventory management, and shipping methods, this user-friendly

manual will help you make more money on eBay. Whether you're selling a single item or running fulltime business on the site, you'll find tips to help you do it more effectively. As in any community, problems and disputes arise, and you'll learn how other eBayers resolve such troubles or work around them. eBay: The Missing Manual has gems of wisdom for everyone from total novices to more experienced traders. If you're looking to improve your eBay auction experience, you'll savor the tips and trick revealed in this guided exploration.

**Living Green: The Missing Manual** The Rosen Publishing Group, Inc  
The hidden patterns behind the way we make decisions Several recent books, from *Blink* to *Freakonomics* to *Predictably Irrational*, have examined how people make choices. But none explain why different people have such different styles of decision making—and why those styles seem consistent across many contexts. For instance, why is a gambler always a gambler, whether at work, on the highway, or in a voting booth?

---

Scott de Marchi and James T. Hamilton present a new theory about how we decide, based on an extensive survey of more than thirty thousand subjects. They show that each of us possesses six core traits that shape every decision, from what to have for lunch to where to invest. We go with “the usual” way of deciding whenever there’s a trade-off between current and future happiness, when facing the risk of a bad outcome, or when a choice might hurt other people. We’re also consistent about how much information we want and how much we care about the opinions of others. Readers can determine their own decision-making profile with a test in the book. Once they understand the six core traits, they’ll have a big advantage in their marketing campaigns, management strategies, investments, and many other contexts.
