This is the first book ever written for the defense on how to avoid runaway jury verdicts. I wrote this book because I care about fairness. I believe everyone has the right to a fair trial, not just plaintiff lawyers and their clients. Defendants are entitled to have a jury decide their case without being stirred with passion and bias by creative plaintiff lawyers. This is the defense "playbook" for justice. You will

---

learn trial techniques to even the playing field for defendants seeking a fair trial. Every aspect of a civil jury trial will be covered, from voir dire to opening statements to witnesses and finally closing arguments. There is a formula for defeating plaintiff attorneys' deceptive tactics and psychological gamesmanship, and you will learn it. While full of 30 years of trial victories and personal experiences, this is a "how to" book. How to defend at trial. How to beat plaintiff attorneys at their own

game. How to win. It is time to bring an end to the epidemic of nuclear verdicts across our country. It is time for you to take back justice for all! NUCLEAR VERDICTS MUST BE STOPPED! YOU CAN STOP THEM. RESPONSIBILITY . In every jury trial, accepting responsibility is not only the right thing to do, it is the most important thing you will do, no exceptions. Own what you did in every single jury trial, no excuses. REASONABLENESS. Be the most reasonable person in the courtroom. Do not take the typical defense

approach of fighting every little thing. Show the jury you care, and they will return a verdict that is fair and just for all. COMMON SENSE. The ultimate equalizer in any case is common sense. It allows the jury to come to a conclusion that is fair and reasonable. You must go beyond the evidence and the law, and help the jury apply their common sense for a righteous verdict. **Popular Mechanics** princeton alumni weekly Spanning the entire child developmental period, Language Disorders from Infancy Through Adolescence, 6th

This indispensable resource explains principles of financial planning and financial psychology to help teens and young adults make good financial decisions now and achieve their financial goals. Financial literacy for savvy teens and

young adults means meeting them where they are, which is in high school and college. It also means understanding how they differ from their Gen X and elder millennial parents. For example, they tend to be debt-averse, thrifty, and responsible but may err on the side of taking too little risk, such as not investing early enough. This book uses economics and psychology to help Generation Z students make better decisions throughout their lives and especially in their formative years. Financial Literacy for Generation Z addresses decisions students have to make while still in school, after graduation, and later, with the greatest emphasis on the

---

decisions closest at hand to them. It encompasses not just money talk—for example, how much to contribute to your 401(k)—but also decisions that are directly connected to money, such as choosing a major and a career, building a credit record, and managing your first real income.

A compassionate, shame-free guide for your darkest days “A one-of-a-kind book . . . to read for yourself or give to a struggling friend or loved one without the fear that depression and suicidal thoughts will be minimized, medicalized or overspiritualized.”—Kay Warren, cofounder of Saddleback Church

What happens when loving Jesus doesn’t cure you of depression, anxiety, or suicidal thoughts? You might be crushed by shame over your mental illness, only to be told by well-meaning Christians to “choose joy” and “pray more.” So you beg God to take away the pain, but nothing eases the ache inside. As darkness lingers and color drains from your world, you’re left wondering if God has abandoned you. You just want a way out. But there’s hope. In *I Love Jesus, But I Want to Die*, Sarah J. Robinson offers a healthy, practical, and shame-free guide for Christians struggling with mental illness. With unflinching honesty, Sarah shares her story of battling depression and

fighting to stay alive despite toxic theology that made her afraid to seek help outside the church. Pairing her own story with scriptural insights, mental health research, and simple practices, Sarah helps you reconnect with the God who is present in our deepest anguish and discover that you are worth everything it takes to get better. Beautifully written and full of hard-won wisdom, *I Love Jesus, But I Want to Die* offers a path toward a rich, hope-filled life in Christ, even when healing doesn’t look like what you expect. **Hearings MIT Press** The authors draw upon scientific studies, theories, site visits, and their

own extensive experiences to describe approaches to social and emotional learning for all levels.

The process of user-centered innovation: how it can benefit both users and manufacturers and how its emergence will bring changes in business models and in public policy. Innovation is rapidly becoming democratized. Users, aided by improvements in computer and communications technology, increasingly can develop their own new products and services. These innovating users—both individuals and

---

firms—often freely share their innovations with others, creating user-innovation communities and a rich intellectual commons. In *Democratizing Innovation*, Eric von Hippel looks closely at this emerging system of user-centered innovation. He explains why and when users find it profitable to develop new products and services for themselves, and why it often pays users to reveal their innovations freely for the use of all. The trend toward democratized innovation can be seen in software and information products—most notably in the free and open-source software movement—but also in

physical products. Von Hippel's many examples of user innovation in action range from surgical equipment to surfboards to software security features. He shows that product and service development is concentrated among "lead users," who are ahead on marketplace trends and whose innovations are often commercially attractive. Von Hippel argues that manufacturers should redesign their innovation processes and that they should systematically seek out innovations developed by users. He points to businesses—the custom semiconductor industry is one example—that have learned to assist user-innovators by

providing them with toolkits for developing new products. User innovation has a positive impact on social welfare, and von Hippel proposes that government policies, including R&D subsidies and tax credits, should be realigned to eliminate biases against it. The goal of a democratized user-centered innovation system, says von Hippel, is well worth striving for. An electronic version of this book is available under a Creative Commons license.
