Car Speakers Wire Colors - Ultimate Guide by Stereo Authority

Brandon, Ordinarily I'd recommend using 12- to 16-gauge speaker wire for subwoofers, but you have something special (huge power) and I think 10-gauge or 12-gauge speaker wire will work best. That amplifier calls for three pairs of 1/0-gauge power and ground wires, in order to feed it power correctly.

### How to Calculate the Best Wire Gauge for Your Car Amplifier

Speakers Wire color codes for different cars There are different colored wirings like blue, white, red, grey, brown, orange, black and many more. These are some of the main standard colors. For different types of cars, there are different wires, with their positive and negative terminals.

Figuring out the speaker wires can be a little more complicated. If the remaining wires are in pairs, where one is a solid color and the other is the same color with a line, then each pair typically goes to the same speaker. You can test this by connecting one wire in the pair to one end of your AA battery and the other end to the other terminal.
