Merely said, the Car Speaker Wire Color Guide is universally compatible with any devices to read

## The Install Doctor - Radio Wire Harness and Colors - Chevy ...

Brandon, Ordinarily I'd recommend using 12- to 16-gauge speaker wire for subwoofers, but you have something special (huge power) and I think 10-gauge or 12-gauge speaker wire will

work best. That amplifier calls for three pairs of 1/0-gauge power and ground wires, in order to feed it power correctly.

In a nutshell: Most speakers don't come with speaker wire. It ' s up to you to select the right gauge (thickness) and type of wire for your system. You can buy speaker wire with connectors or without. For in-wall or ceiling speakers, you'll need UL-rated speaker wire labeled CL2 or CL3. Read our in-wall wiring guide for more information.

Figuring out the speaker wires can be a little more complicated. If the remaining wires are in pairs, where one is a solid color and the other is the same color with a line, then each pair typically goes to the same speaker. You can test this by connecting one wire in the pair to one end of your AA battery and the other end to the other terminal.
