Political sociology is the interdisciplinary study of power and the intersection of personality, society and politics. The field also examines how the political process is affected by major social trends as well as exploring how social policies are altered by various social forces. Political sociologists increasingly use a wide variety of relatively new quantitative and qualitative methodologies and incorporate theories and research from other social science cognate disciplines. The contributors focus on the current controversies and disagreements surrounding the use of different methodologies for the study of politics and society, and discussions of specific applications found in the widely scattered literature where substantive research in the field is published. This approach will solidly place the handbook in a market niche that is not occupied by the current volumes while also covering many of the same theoretical and historical developments that the other volumes cover. The purpose of this handbook is to summarize state-of-the-art theory, research, and methods used in the study of politics and society. This area of research encompasses a wide variety of perspectives and methods that span social science disciplines. The handbook is designed to reflect that diversity in content, method and focus. In addition, it will cover developments in the developed and underdeveloped worlds.

The iconic shape and appearance of a streamline aluminum trailer sitting at a campsite or being pulled down the highway has captivated collectors and vacationing hobbyists for nearly 90 years. During this time, the exterior appearance of the trailer has changed very little, so recollections can range from seeing a 1937 Dodge Pickup to a 1969 Impala hauling one of these beauties. Today, restored rarities from Airstream, Silver Streak, Boles Aero, Clipper, and Spartan can command as much as \$100,000 in the marketplace. These trailers have become symbols of American pop culture for several generations. Until now, very little information has been available to help you when it comes to restoring and updating one of these trailers. Daniel Hall, of the vintage restoration company Camper Repair Paradise, addresses all items of streamline trailer restoration thoroughly in this one-stop-shopping book. Details on your trailer and how to restore it are covered from trailer tongue to trailing bumper. Key restoration components including chassis, floor, exterior/interior skin, electrical elements, insulation, doorjamb refabrication, LP, plumbing, and polishing are all covered comprehensively in a visual, step-by-step format. Whether you're a collector car enthusiast, resident of a trailer campground, or a vacationing addict, owning this restoration guide will be an essential tool in keeping your trailer active, updated, and in immaculate condition. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px

Europe in the Middle Ages Little, Brown

At the time of its publication in 1881 "The Old Santa Fe Trail" was called the most interesting book ever written by an army officer. It can scarcely fail to occur to the thoughtful reader of this engrossing book that the current conception of American history, as gained from the textbooks and manuals in common use, is singularly narrow and one-sided. The story of the magnificent pioneering exploits of the Spaniards, and of our own subsequent conquest and development of the vast Western and Southwestern territory which they were the first to enter and to settle, has been curiously neglected. There is no chapter in this story that is richer in the essential elements of romance, or of greater and more absorbing interest to the American reader, than the one contained in Colonel Inman's book. The Old Santa Fe Trail was once the great highway from the lower Missouri River to New Mexico. The first European to traverse it was De Vaca a Spanish explorer of the sixteenth century. De Vaca was the precursor of the later caravans of pack-mules and " prairie schooners," which in their turn gave way to the swift trains of the great Atchison, Topeka and Santa Fé Railway, which now spans the continent, and for nigh a thousand miles of its romantic course parallels and often coincides with the Old Trail. Thus the tourist who is whirled in a palace car over this route is traversing storied ground, where nearly every stream and hill and dale has its tale of peril or adventure. The thrilling story of the Old Trail and its doughty heroes is told sympathetically and in full detail by Colonel Inman. His book has a distinct historical value, and it is as readable as a romance of Scott or Stevenson. It is a book wherein American patriotism and national pride may find true nourishment; and therefore it is a book that every American youth ought to read.

From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters? * The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. **THE DISAPPEARING SPOON** masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. *Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their

utensils disappear.

This handbook is the fourth in a series of joint publications by the European Travel Commission (ETC) and the World Tourism Organization (UNWTO) in the area of methodological manuals. The first three manuals were "Evaluating NTO Marketing Activities" (ISBN 9789284406364); "Tourism Market Segmentation" (ISBN 9789284412075) and "Tourism Forecasting Methodologies" (ISBN 9789284412389). The internet and other new technologies have changed the tourism industry in an unprecedented way, and keeping pace has become challenging. Online information is now one of the primary influences on consumer decisions in nearly all major markets. For example, 41 per cent of tourists arriving in Spain in 2007 had booked through the internet, and in the United States the number of trips bought online exceeded those purchased offline. Such changes are impacting and influencing the way destinations and companies manage and market themselves.

In *Storm Kings*, Lee Sandlin retraces America's fascination and unique relationship to tornadoes and the weather. From Ben Franklin's early experiments, to "the great storm debates" of the nineteenth century, to heartland life in the early twentieth century, Sandlin shows how tornado chasing helped foster the birth of meteorology, recreating with vivid descriptions some of the most devastating storms in America's history. Drawing on memoirs, letters, eyewitness testimonies, and numerous archives, Sandlin brings to life the forgotten characters and scientists that changed a nation and how successive generations came to understand and finally coexist with the spiraling menace that could erase lives and whole towns in an instant.

As the introduction says, 'clarity of writing usually follows clarity of thought.' The Economist Style Guide gives general advice on writing, points out common errors and clichés, offers guidance on consistent use of punctuation, abbreviations and capital letters, and contains an exhaustive range of reference material - covering everything from accountancy ratios and stock market indices to laws of nature and science. Some of the numerous useful rules and common mistakes pointed out in the guide include: *Which informs, that defines. This is the house that Jack built. But: This house, which Jack built, is now falling down. Discreet means circumspect or prudent; discrete means separate or distinct. Remember that "Questions are never indiscreet. Answers sometimes are" (Oscar Wilde). Flaunt means display, flout means disdain. If you flout this distinction you will flaunt your ignorance Forgo means do without; forego means go before. Fortuitous means accidental, not fortunate or well-timed. Times: Take care. Three times more than X is four times as much as X. Full stops: Use plenty. They keep sentences short. This helps the reader.
