How to Adjust a Carburetor: 10 Steps (with
Pictures) - wikiHow
Adjusting the carburetor is a lot like tuning a
guitar or other stringed instrument. You want
to turn the screws equally, smoothly, and
slowly until you find the sweet spot. Regardless
of whether or not the engine is running too
rich or too lean, bring it down to a very lean
mixture by turning both screws a quarter-turn
at a time, counter-clockwise, then slowly
bringing them back up to an equal and smooth
mixture. [4]
