100 Questions and Answers About Heart

Attack and Related Medical Problems by eminent cardiologist Edward K. Chung, MD covers a wide range of topics, including heart attack basics-what constitutes normal heart function and what happens in a heart attack; risk factors, causes, diagnosis, treatment and side effects; and strategies for coping with emotional and healthcare issues. Includes a discussion of conditions that mimic heart attack as well as arrhythmias and angina pectoralis. Also contains a comprehensive appendix of resources for finding out more information, contacting support groups a

---

recertification. It contains 900 questions in the same proportion as the actual exam to ensure highly targeted, high-yield preparation. Answers with brief explanations and references are included. Indications for particular procedures—a major focus of the board exam—are integrated throughout the text, particularly in the context of ACC/AHA guidelines. More than 250 angiograms and other illustrations reinforce key concepts. Separate chapters cover ACC/AHA guidelines for percutaneous coronary intervention, chronic stable angina, acute coronary syndromes, and ST-elevation myocardial infarction. A chapter on test-taking is also included.

---

Interventional Cardiology. Board certification is designed to recognize excellence among physicians specializing in interventional cardiology. Interventional Cardiology: The Essentials for the Boards is the first book to be written in accordance with the American Board of Interventional Medicine's own guidelines. The book is structured to accurately represent the balance of subject matter that can be expected on the certification examination. Care is taken to cover the essential points in each individual topic, highlighting state-of-the-art therapy and unresolved issues. Most chapters are

presented in a question-and-answer format, along with a chapter of clinical case descriptions covering a broad range of clinical and interventional problems. A special chapter of "Interventional Cardiology Pearls" provides condensed, easily digested summaries of the most useful information in the previous chapters. In addition, it is the first book of its kind to include a detailed Table of Contents and a Subject Index, making it easy for the examinee to locate specific topics. This book will be of great help to interventional cardiologist specialists preparing for the board certification exams. General cardiologists, cardiology nurses,

---

cardiac catheterization lab support staff, and general cardiology fellows interested in increasing their understanding of intervention and related topics will also find this work useful.

Cardiology Secrets E-

Book CRC Press

Cardiology is a large and critical branch of internal medicine, and as such covers a vast amount of the knowledge tested in Membership of the Royal Colleges of Physicians (MRCP) exams. This study guide contains 150 multiple choice questions (MCQs), each with various numbers of stem answers. The questions cover a wide range of both

cardiology and cardiovascular pharmacology and encompass both basic anatomy and physiology of the heart, through to advanced topics such as evidence-based medicine. The questions are supplemented at the back of the book with explanatory answers to aid further revision and study.
