integrated text to help you recognize, understand and know how to investigate and manage many heart-related disorders and conditions. Written by three practising cardiologists, it leads students through a clinical approach to managing problems with 26 real-world cardiovascular cases. There is strong emphasis on high-quality figures, particularly 12-lead ECGs, as these play such a major role in the evaluation of the cardiac patient. Following a question-answer approach throughout the

narrative, with self-assessment MCQs, EMQs and SAQs, *Cardiology: Clinical Cases Uncovered* includes sections on cardiac anatomy, physiology and pathology which provide the essentials required to understand clinical cardiology, and is ideal for medical students and junior doctors on the Foundation Programme, specialist nurses and nurse practitioners, and for those with plans for a career in cardiology.

Highly Commended (Cardiology category), BMA Awards 2005. Coronary heart disease (CHD) is an enormous health problem in the developed world. It is the commonest cause of death worldwide, and GPs and nurse practitioners have a vital role to play in diagnosis, management and risk reduction. In the popular Q and A format of the Your Questions Answered series, this book provides succinct, expert information on CHD. Although aimed mainly at the primary care practitioner, it also addresses many questions asked about CHD by other physicians, practice and

community nurses, medical students and trainees, and indeed patients. With an emphasis on evidence-based, up-to-date knowledge, the authors discuss all aspects of this serious condition, including relative risk factors; the role of lifestyle in both prevention strategies and management; and the use of drug therapies, including ACE inhibitors and statins. Some frequently asked patient questions, in non-medical language, are included, and there is a list of sources of further information and patient support. Popular question-and-answer format

"A Heart Book contains greater detail than is typically provided in resources given patients by

their doctors. In my experience, patients will only ask about and talk about their heart when they are afraid. Fear draws them to search for additional help and perhaps stumble on misinformation. I want to alleviate fear by providing direct answers, based on real evidence, to help patients make better decisions." "The secret of getting ahead is getting started.
