900 Questions Oxford University Press

Cardiology is a large and critical branch of internal medicine, and as such covers a vast amount of the knowledge tested in Membership of the Royal Colleges of Physicians (MRCP) exams. This study guide contains 150 multiple choice questions (MCQs), each with various numbers of stem answers. The questions cover a wide range of both cardiology and cardiovascular pharmacology and encompass both basic anatomy and physiology of the heart, through to advanced topics such as evidence-based medicine. The questions are supplemented at the back of the book with explanatory answers to aid further revision and study.

Mayo Clinic Cardiology Concise Textbook and Mayo Clinic Cardiology Board Review Questions & Answers CRC Press

This book serves as a board review book for cardiovascular magnetic resonance imaging (CMR). CMR is now an essential part of cardiology training and there is yet to be a dedicated review book for the topic. This book seeks to fill that gap. With 150 questions and answers, this review provides a comprehensive and easily readable educational tool for trainees and cardiologists. The book is divided into 10 chapters, each about 15 questions. The multiple-choice questions cover topics according to the board examinations blueprints, including a wide spectrum of cardiac pathologies and concepts. Answers are supported by concise summaries and explanations to aid understanding. Each question also includes links to the latest resources and literature. This book helps readers not only prepare for CMR boards, but provides a good review of anatomy and pathology for cardiac imagers.

Echocardiography Board Review Lippincott Williams & Wilkins

This short book focuses on the possible examination questions and their answers on the cardio-vascular system. In the era of modern technology and the internet of things, student learning has gone

beyond the approved textbooks and teachers due to the overload of information that is easily available on the internet using different search engines. The trend and fashion are so deep-rooted to the extent that the Google search engine is the ' Bible ' for everyone. These days ' students do a common mistake of going through information overload and assuming the information available on the web as knowledge. It is very well true for medical students; information overload confuses the mind and focus of study. This book aids a learner of the cardiovascular system, to know the appropriate depth of knowledge that one needs to know. In the evaluation-based academic assessment, student knowledge is measured by different methods of assessment tools such as written examinations such as long essay, short essay, viva-voce, etc. This book provides comprehensive and concise knowledge based on a question so that a student develops an awareness that helps to frame the answer required for a question.

Textbook Study Guide of Cardiology CRC Press

Essential Revision Notes for Cardiology KBA Oxford University Press

This user-friendly review question book is geared specifically to candidates taking the Cardiovascular Boards and the Cardiovascular section of the Internal Medicine Boards, whether for initial certification or for recertification. The book contains over 700 questions with answers, focusing on the specific areas tested. Content areas are covered in the same proportion as on the actual exam to ensure highly targeted, high-yield preparation. This edition's questions are based on patient-oriented scenarios to mimic the Boards. The electrophysiology chapters have been completely revised and include more tracings. Sections on heart failure, coronary artery disease, and STEMI treatment have been significantly revised to reflect current American Heart Association-American College of Cardiology guidelines.

100 Questions and Answers about Congestive Heart Failure Year Book Medical Pub

This book looks at some of the cardiological queries that could arise in

the daily work of a general practitioner, such as: would you send a patient with a myocardial infarction into hospital or keep him at home? In what circumstances would you actively encourage dietary change? How brisk should a brisk walk be? Angina or indigestion - is there a simple way to tell? What restrictions should be placed on a child with a minor cardiac defect? What evidence is there to suggest that bypass surgery increases life expectation? How would you advise the old gentleman with a pacemaker about to return home to his microwave? What considerations relate to heart disease and driving, or flying?
