Packed with high-quality photos and illustrations, DELMAR'S

STANDARD TEXTBOOK OF ELECTRICITY, 6e combines comprehensive coverage of basic electrical theory with practical how to information that prepares readers for real-world practice. Its clear presentation uses schematics and large illustrations to bring concepts to life, while examples throughout demonstrate how to do common tasks electricians perform. Succinct units covering one or two topics make

the book easy to digest. The Sixth Edition is updated to the 2014 NEC and includes new coverage of AC servo motors, AC torque motors, motor nameplate data, RL time constants, AC waveforms, and more. An interactive online course mode called Mindtap that includes the entire text, multi-media assets, customization and social media options will be available

The molecular basis for atrial fibrillation continues to be largely unknown, and therapy remains unchanged, aimed at controlling the heart rate and preventing systemic emboli with anticoagulation. Familial atrial fibrillation is more common than previously suspected. While atrial fibrillation is

commonly associated with acquired heart disease, a significant proportion of individuals have early onset without other forms of heart disease, referred to as "lone" atrial fibrillators. It is also well recognized that atrial fibrillation occurs on a reversible or functional basis, without associated structural heart disease, such as with hyperthyroidism or of atrial fibrillation following surgery. It remains to be determined what percentage in these individuals

is familial or due to a genetic predisposition. Mapping the locus for familial atrial fibrillation is the first step towards the identification of the gene. Isolation of the gene and subsequent identification of the responsible molecular genetic defect should provide a point of entry into the mechanism responsible for the familial form and the common acquired forms of the disease and eventually provide more effective therapy. We know that the ionic currents responsible for the action potential of

the atrium is due to multiple channel proteins as is electrical conduction throughout the atria. Analogous to the ongoing genetic studies in patients with familial long QT syndrome, it is highly likely that defects in each of these channel proteins will be manifested in familial atrial fibrillation.

Rapid advancements in cardiac electrophysiology require today's health care scientists and practitioners to stay up to date with new information both at the bench and at the bedside. The fully revised 7th Edition of *Cardiac Electrophysiology: From Cell to Bedside*, by Drs. Douglas Zipes, Jose Jalife, and William Stevenson, provides the comprehensive, multidisciplinary coverage you need, including

the underlying basic science and the latest clinical advances in the field. An attractive full-color design features color photos, tables, flow charts, ECGs, and more. All chapters have been significantly revised and updated by global leaders in the field, including 19 new chapters covering both basic and clinical topics. New topics include advances in basic science as well as recent clinical technology, such as leadless pacemakers; catheter ablation as a new class I recommendation

for atrial fibrillation after failed medical therapy; current cardiac drugs and techniques; and a new video library covering topics that range from basic mapping (for the researcher) to clinical use (implantations). Each chapter is packed with the latest information necessary for optimal basic research as well as patient care, and additional figures, tables, and videos are readily available online. New editor William G. Stevenson, highly regarded in the EP community, brings a fresh

Delmar Thomson Learning  
This third edition is the most comprehensive and dynamic learning package on the market for Medical Assisting. It boasts the most skills and procedures covered and includes key areas either not found or lightly touched on in other books such as: History of Medicine, Professional Procedures, coverage of OSHA and CLIA, and transcription. All ABHES and CAAHEP competencies are

covered. The new edition maps to the latest CAAHEP Standards and Guidelines for Medical Assisting Educational programs and the ABHES Program Requirements and Curriculum. Comprehensive Medical Assisting: Administrative and Clinical Competencies provides more opportunity for critical thinking through case studies, critical thinking questions, scenarios, and features tying to both of Delmar's Medical Assisting DVD series. The book also emphasizes softer skills such as professionalism and practical skills including how to

comply with HIPAA regulations and deal with privacy issues on the job. Delmar is a part of Cengage Learning.
