Financial struggles of American families are headline news. In communities across the nation, families feel the pinch of stagnant and sometimes declining incomes. Many have not recovered from the Great Recession, when millions lost their homes and retirement savings. They are bombarded daily with vexing financial decisions: Which bills to pay? Where to cash checks? How to cover an emergency? How to improve a credit report? How to bank online? How to save for the future? Low- and moderate-income families have few places to turn for guidance on financial matters. Not many can afford to pay a financial advisor to help navigate an increasingly complex financial world. They do their best with advice from family and trusted individuals. Social workers, financial counselors, and human services professionals can help. As "first responders," they assist families and help in finding financial support from public and private sources. But these professionals are too often unprepared to address the full range of financial troubles of ordinary working families. *Financial Capability and Asset Building in Vulnerable Households* prepares social workers, financial counselors, and other human service professionals for financial practice with vulnerable families. Building on more than 20 years of research, the book sets the stage with key concepts, historical antecedents, and current financial challenges of families in America. It provides knowledge and tools to assist families in pressing financial circumstances, and offers a lifespan perspective of financial capability and environmental influences on financial behaviors and actions. Furthermore, the text details practice principles and skills for direct interventions, as well as for designing financial services and policy innovations. It is an essential resource for preparing the next generation of practitioners who can enable families to achieve economic security and development.

and explains in an orderly way on the rules and procedures
governing the administration of a decedent's estate, including
Minnesota's income tax, inheritance tax, and estate tax collection

occurs, it describes each of the actions required and the options
available in every phase of estate administration - from the original
application through the final distribution. This valuable resource
contains virtually all of the primary authorities an attorney or
personal representative would commonly use in administering a
decedent's estate: the relevant statutes; the multi-party accounts

Perspectives on Financial Services

It would be difficult to find a more heated topic in American political
circles than tax cuts. Do they help the economy, the rich, or the
middle class? Or do they harm the economy? Do the rich benefit the

most and should they? Tax cuts are closely tied to the Tax Code which very few people truly understand. The new book tries to make sense out of this impenetrable jungle of issues, projections and actual tax cuts. Contents: Preface; Tax Cut Bills in 2003: A Comparison; Across-the-Board Tax Cuts: Economic Issues; Tax Cuts, the Business Cycle, and Economic Growth: A Macroeconomic Analysis; Using Business Tax Cuts to Stimulate the Economy; Tax Cuts and Economic Stimulus: How Effective Are the Alternatives?; Economic and Revenue Effects of Permanent and Temporary Capital Gains Tax Cuts; The Individual Alternative Minimum Tax: Interaction With Marriage Penalty Relief and Other Tax Cuts; Major Tax Issues; Index.

Tax Cuts

The Child and Dependent Care Credit (CDCC), a tax credit based on taxpayers' income and child care expenses, reduces families' child care costs. The nonrefundable federal CDCC is available to working families with children younger than 13 years old in all states, and nearly half of states supplement the federal credit with their own child care credits. The Economic Growth and Tax Relief Reconciliation Act expanded the federal CDCC in 2003, which led to differential increases in CDCC generosity across states and family sizes. I document CDCC eligibility and expenditures over time and across income and demographic groups. Using data from the March Current Population Survey, I find that a 10 percent increase in CDCC benefits increases annual paid child care participation by 4–5 percent among households with children younger than 13 years old. I also find that CDCC benefits increase labor supply among married mothers. Increases in labor supply among married mothers with very young children suggest that CDCC benefits may generate long-run earnings gains.
