transponder programmer. CARPROG developing purposes :

CARPROG - CODECARD.EU

Using the CarProg, the user can read an eeprom using various methods. One popular method is on the PCB (Printer Circuit Board) and in most cases, the eeprom can be read. Some examples are the 24C02, 24C04, 24C08, 24C16 and others can be the 83C86 and 95080. In some occasions, the eeprom may not be read

and an oscillator may need to be shorted. *Carprog clone - CODECARD.LT*

CarProg user manual

Powering up the device. CarProg can be used with external power supply (+7 - +12V stabilized), only with USB connection or with diagnostic cable (for ex. OBDII) • Standard power socket (positive in the middle) voltage in range +7...14V stabilized can be

used in any cases.
