The Third Edition of ANSI/ACCA Manual D is the Air Conditioning Contractors of America procedure for sizing residential duct systems. This procedure uses Manual J (ANSI/ACCA, Eighth Edition) heating and cooling loads to determine space air delivery requirements. This procedure matches duct system resistance (pressure drop) to blower performance (as defined by manufacture's blower performance tables). This assures that appropriate airflow is delivered to all rooms and spaces; and that system airflow is compatible with the operating range of primary equipment. The capabilities and sensitivities of this procedure are compatible with single-zone systems, and multi-zone (air zoned) systems. The primary equipment can have a multi-speed blower (PSC motor), or a variable-speed blower (ECM or constant torque motor, or a true variable speed motor). Edition Three, Version 2.50 of Manual D (D3) specifically identifies normative requirements, and specifically identifies related informative material.

" Scare headlines about the first human clones appear in our newspapers. Biotech companies brag about manufacturing human embryos as "products" for use in medical treatments. Events are moving so fast—and biotechnology seems so complicated—that many of us worry we can't keep up. But now, Wesley J. Smith provides us with a guide to the brave new world that is no longer a figment of our imagination, but a reality just around the corner of our lives. Smith unravels the mystery of stem cells and shows what's at stake in the controversy over using them for research. He describes the emerging science of human cloning—the most radical technology in history—and shows how it moves forward inexorably against the moral consensus of the world. But at the core of this highly readable and carefully researched book is a report on the gargantuan "Big Biotech" industry and its supporters in the universities and the science and bioethics establishments. Smith reveals how the lure of huge riches, mixed with the ideology of "scientism," threatens to

impose on society a "new eugenics" that would dismantle ethical norms and call into question the uniqueness and importance of all human life. "At stake," he warns, "is whether science will continue to serve society, or instead dominate it." In Consumer's Guide to a Brave New World, Smith presents a clear-eyed vision of two potential futures. In one, we will use biotechnology as a powerful tool to treat disease and improve the quality of our lives. But in another, darker scenario, we will be steered onto the antihuman path that Aldous Huxley and other prophetic writers warned against half a century ago. "

Consumer's Guide to a Brave New World

Products of modern artificial intelligence (AI) have mostly been formed by the views, opinions and goals of the "insiders", i.e. people usually with engineering background who are driven by the force that can be metaphorically described as the pursuit of the craft of Hephaestus. However, since the present-day technology allows for tighter and tighter mergence of the "natural" everyday human life with machines of immense complexity, the responsible reaction of the scientific community should be based on cautious reflection of what really lies beyond AI, i.e. on the frontiers where the tumultuous ever-growing and ever-changing cloud of AI touches the rest of the world. The chapters of this boo are based on the selected subset of the presentations that were delivered by their respective authors at the conference "Beyond AI: Interdisciplinary Aspects of Artificial Intelligence" held in Pilsen in December 2011. From its very definition, the reflection of the phenomena that lie beyond AI must be inherently interdisciplinary. And so is this book: all the authors took part in a mutual transdisciplinary dialogue after explaining their views on AI not only to a narrow selection of their usual close peers with the same specialisation, but to a much broader audience of various experts from AI engineering, natural sciences, humanities and philosophy. The chapters of this book thus reflect results of such a dialogue.
