Readers' Guide to Periodical Literature IGI Global Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages. It is the culmination of over twenty years of research and development by the authors. The Simplified Sign System has been developed and tested for ease of sign comprehension, memorization, and formation by limiting the complexity of the motor skills required to form each sign, and by ensuring that each sign visually resembles the meaning it conveys. Volume 1 outlines the research underpinning and informing the project, and places the Simplified Sign System in a wider context of sign usage, historically and by different populations. Volume 2 presents the lexicon of signs, totalling approximately 1000 signs, each with a clear illustration and a written description of how the sign is formed, as well as a memory aid that connects the sign visually to the meaning that it conveys. While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities, cerebral palsy, autism, or aphasia, it may also assist the communication needs of a wider audience – such as healthcare professionals, aid workers, military personnel ,

travellers or parents, and children who have not yet mastered spoken language. The system also has been shown to enhance learning for individuals studying a foreign language. Lucid and comprehensive, this work constitutes a valuable resource that will enhance the communicative interactions of many different people, and will be of great interest to researchers and educators alike.

An acknowledged master of the short story, Raymond Carver (1938-88) excelled at portraying the hardscrabble existence of blue-collar workers frustrated and disillusioned by the false promises of the American dream. This terrain was well known to Carver, who long worked at blue-collar jobs to support his family and personally struggled with the transiency, alcoholism, economic privation, and despair he depicts so poignantly in his fiction. At the same time, he overcame these obstacles - aided by, among others, the writer John Gardner, the editor Gordon Lish, and the poet Tess Gallagher - to become a major figure in the resurgence of the short story and the revival of realistic writing. For collections like *Will You Please Be Quiet, Please?*, *What We Talk About When We Talk about Love*, and the magnificent *Cathedral*, Carver won honor after honor, including nominations for the National Book Award, the National Book Critics Circle Award, and the Pulitzer Prize. And with the 1993 release of Robert Altman's film *Short Cuts*, Carver, long known to readers of serious fiction, attained widespread public recognition. Tracing these

themes and more is Adam Meyer's *Raymond Carver*, which considers more of the writer's fiction and poetry than has any previous book-length study. Writing with luminous clarity, Meyer delves into the biographical elements shaping the writer's career and probes Carver's style and subject matter; he then examines the majority of the fictional works, organizing his material according to distinct phases in the writer's canon, while devoting a separate chapter to Carver's poetry. Of special appeal are Meyer's insightful comparison of stories published in multiple versions and his informed discussion of minimalism - a term often applied to Carver's writings but, Meyer argues, only partly, if at all, with accuracy.

Encompasses Uniform Federal Law and the Unique Aspects of Maryland Law Even more than most areas of the law, elder law tends to be state specific. In Maryland, long-term medical care regulations, health care decision making, and guardianship are just a few of the areas in which state law cannot be subsumed in general statements of majority rules or hornbook law. Yet, at the same time, uniform federal law governs Social Security issues and various consumer protection statutes and housing assistance programs. *Elder Law in Maryland* provides guidance to both applicable federal law and the unique aspects of Maryland elder law. Practical, Comprehensive Guidance for the Maryland Practitioner In a single, concise volume, *Elder Law in Maryland* accurately renders elder law as it currently exists in Maryland. It addresses the nexus between senior citizens and the law at those points most relevant to the legal practitioner specifically and to those serving seniors generally. Using this book as a guide, you can feel confident that you are considering all the options when planning for medical, financial, and quality of life decisions. In keeping with its practical focus, *Elder Law in Maryland* contains forms and documents conforming to Maryland law, texts of landmark cases, and checklists of essential elements for both office and courtroom.

The General Factor of Personality improves our understanding of the personality structure and the relations between major personality dimensions, as well as major dimensions of the entire non-cognitive sphere of

psychological variables. The results of the empirical testing and theoretical evaluations in this book contribute to the more comprehensive and precise theoretical framework of the General Factor of Personality (GFP) and that of the entire personality structure. Additionally, the book answers some unresolved questions concerning the nature of the GFP, including whether it is based more on correlations in real behavior or on other less substantial factors between lower-order dimensions of personality. This book is crucially important not only for theoretical reasons, but also for the tremendous practical and applied value of the assumed general dimension of personality. As a common denominator of all the most important fields of personality beyond cognition (Big Five, well-being, coping, emotionality, motivation, self-concept, self-esteem, control, wisdom and others), the GFP represents an extremely strong single predictor of the quality of life, mental health and well-being, career, academic success, and the quality of family and interpersonal relations. Reviews the theoretical and methodological work on the General Factor of Personality (GFP) Presents major research results in the field of GFP and the dimensional structure of personality Provides a balanced and objective approach to the topic of GFP, addressing criticisms and controversies Considers the practical and applied aspects of this research Draws conclusions on the bioevolutionary model of GFP to give a more thorough understanding of biological bases of human personality

An aesthetic perspective on the short fiction of Chekhov, Joyce, Hemingway, O'Connor, and Carver Taking a distinctively aesthetic approach to the genre of realist short fiction, Kerry McSweeney clusters the work of five masters--Anton Chekhov,

James Joyce, Ernest Hemingway, Flannery O'Connor, and Raymond Carver--to offer a poetics of the form for students and scholars. At the center of this argument is the notion that the realist short story is a glimpse--powerful and tightly focused--into a world that the writer must precisely craft and in which the reader must fully invest. Selecting writers from different generational, national, and cultural backgrounds, McSweeney chooses writers based on their commitment to the realist representation of experience and their shared belief in the importance and efficacy of the short story form. By considering their efforts in tandem, he develops a means to assess the strategies and claims of realist short fiction. McSweeney demonstrates that when the comments these writers have made about their work are assembled and critically scrutinized, the result is an aesthetic critical model--as opposed to more interpretative models that focus attention on the determination (or indetermination) of meanings. He suggests that a fully adequate reading of a realist short story involves the integration of three components: the enjoyment and contemplation of the story in and of itself; affective receptivity, or a response to the story's emotional content; and cognitive activity, or the reflective consideration of the story's conceptual implications. In individual chapters on Chekov, Joyce, Hemingway, O'Connor, and Carver, this presentational model is applied to widely known and often anthologized readings from each writer. McSweeney brings into sharp focus the distinctive features of each piece, makes qualitative discriminations, and assesses the profitability of other critical models. He concludes with an invitation to test the mettle of his approach in reading other realist short story writers.

"...how a man rallies to life's challenges and weathers its storms tells everything of who he is and all that he is likely to become." —St. Augustine It has long been understood that how a person adjusts to life stresses is a major component of his or her ability to lead a fulfilling life. Yet it wasn't until the 1960s that coping became a discrete topic of psychological inquiry. Since then, coping has risen to a position of prominence in the modern psychological discourse—especially within the personality, cognitive, and behavioral spheres—and, within the past decade alone, many important discoveries have been made about its mechanisms and functioning, and its role in ongoing psychological and physical health and well-being. A book whose time has come at last, the *Handbook of Coping* is the first professional reference devoted exclusively to the psychology of coping. Reporting the observations and insights of nearly sixty leading authorities in stress and coping from a wide range of affiliations and schools of thought, it brings readers the state of the art in coping theory, research, assessment, and applications. In orchestrating the book, the editors have scrupulously avoided imposing any particular slant or point of view, other than the need to foster greater eclecticism and cooperation between researchers and clinicians concerned with the phenomenon of coping. The *Handbook of Coping* is divided into five overlapping parts, the first of which serves to lay the conceptual foundations of all that follows. It traces the history of coping from its origins in psychoanalytic theories of unconscious defense mechanisms, and provides an exhaustive review of the latest conceptualizations,

models, and constructs. The following section provides an in-depth exploration of current research methodology, measurement, and assessment tools. Part Three explores key facets of coping in a broad range of specific domains, including everyday hassles, chronic disease, cataclysmic events, and many others. The penultimate section focuses on individual differences. Among important topics covered here are coping styles and dispositions; the role of family, social support, and education; and coping behaviors across the life span. The final section, Part Five, is devoted to current applications. Clinical parameters are defined and a number of specific interventions are described, as are proven techniques for helping clients to improve their coping skills. A comprehensive guide to contemporary coping theory, research, and applications, the Handbook of Coping is an indispensable resource for practitioners, researchers, students, and educators in psychology, the health sciences, and epidemiology. Of related interest ... EGO DEFENSES: Theory and Measurement —Edited by Hope R. Conte and Robert Plutchik This book explores the nature and manifestations of defense mechanisms and traces ego defense theory and research from Freud's initial conceptualization through recent work in object-relations theory and other psychoanalytically oriented approaches. It provides clinical guidelines for diagnosing, assessing, and dealing with defenses, reviews empirical research techniques, and indicates their value in development and in psychotherapy. This volume should be of value to theoreticians, clinicians, and researchers interested in finding appropriate tools for measurement of defense mechanisms. 1994 SOCIAL SUPPORT: An Interactional View —Edited by

Barbara R. Sarason, Irwin G. Sarason, and Gregory R. Pierce The study of social support and its relationship to personality, health, and adjustment is one of the fastest growing areas of research and application in psychology. This book contains integrative surveys of clinical and field studies, experimental investigations, and life-span explorations. It approaches social support as an important facet of interpersonal relationships and shows its undesirable, as well as its positive, features. 1990 (0-471-60624-3) 528 pp.
