Designing Usable Texts covers the analysis of textual communication processes in the real world of publishing systems and work sites. The book presents topics on designing and understanding of written texts; authoring, editing, and the production process; and training authors of informative documents. The text also

describes the policies and processes of editing; lessons in text design from an instructional design perspective; and graphics and design alternatives such as studying strategies and their implications for textbook design. The identification of information requirements such as understanding readers and their uses of texts, modeling users and their use of technical manuals, is also considered. Psychologists and people involved in communication design, document design, information mapping, and educational technology will find the book invaluable. A History of Cookbooks provides a sweeping literary and historical overview of the cookbook genre, exploring its development as a part of food culture beginning in the Late Middle Ages. Studying cookbooks from various Western cultures and languages, Henry Notaker traces the transformation of recipes from brief notes with ingredients into detailed recipes with a specific structure, grammar, and vocabulary. In addition, he reveals that cookbooks go far beyond offering recipes: they tell us a great deal about nutrition, morals, manners, history, and menus while often providing entertaining reflections and commentaries. This innovative book demonstrates that cookbooks represent an interesting and important branch of nonfiction literature.

El Alamein was one of the pivotal battles of the Second World War, fought by armies and air forces on the cutting edge of military technology. Yet Alamein has always had a patchy reputation - with many commentators willing to knock its importance. This book explains just why El Alamein is such a controversial battle. Based on an intensive reading of the contemporary sources, in particular the extensive and recently declassified British bugging of Axis prisoners of war, military historian Simon Ball turns Alamein on its head, explaining it as a cultural defeat for Britain. Alamein is a military history of the battle - showing how different it looks stripped of later cultural excrescences. But it also shows how 'Alamein culture' saturated the post-war world, when archival sources mingled with film, novels, magazines, popular histories, and the rest of Alamein's footprint. Whether you are interested in the battle itself or its cultural afterlife, if you have an opinion about Alamein, you'll question it after reading this book.

Pure and Applied Science Books, 1876-1982 Mercer University Press Go Beyond "Business As Usual" with Your Nonprofit "At last--the 'real truth' about nonprofit management! In Exposing the Elephants, Wilcox reveals the 'pesky pachyderms' that block our way to full effectiveness. How often have we grumbled that 'just because you're a [insert profession here], it doesn't mean you know how to run a nonprofit'? With clarity, passion, and sly humor, Wilcox validates that perspective and many others--but doesn't let us get away with just accepting the presence of the elephant in the room. Wilcox summarizes complex issues using recognizable examples and then offers sensible strategies for resolving them. Ultimately, she gives us permission to do the right thing(s). I love this book--and I can't wait to start implementing the 'elephant solutions'!" --Nancy Perkin Beaumont, CAE, Executive Director, Society of American Archivists "Before I finished reading Exposing the Elephants, I met with my key staff to talk about what we must change. I also shared what I learned from reading the book with a friend who sits on several different types of boards. Wilcox says it like it is--and it needs to be said--in every nonprofit organization." --Julie Donovan, Executive Director, Habitat for

Humanity, Lake County, Illinois "A remarkably candid, fresh, and witty analysis of the challenges inherent in managing nonprofits. Insightful and pragmatic solutions to overcoming the 'white elephants' so prevalent in the nonprofit culture. A 'must read' for every nonprofit CEO and board member." --Dick Yingst, President & CEO, Financial Managers Society, Chicago, Illinois "Pam Wilcox is willing to say the things that nonprofit professionals often do not wish to hear. She reveals through clear language and flowing style the significant barriers that nonprofits face and need to remove for not just success but also excellence. Unlike many authors who point out what is wrong with nonprofits, Wilcox shows us the way to tackle our most intractable issues and move to excellence. This book should be read by any and everyone involved in the nonprofit sector." --Katrina S. Rogers, PhD, Associate Dean, Research and Practice Director, Center for Innovation in the Nonprofit Sector, Fielding Graduate University The Bulletin John Wiley & Sons

This fully updated sixth edition of a classic classroom text is essential reading for core courses in archaeology. Archaeology: An Introduction explains how the subject emerged from an amateur pursuit in the eighteenth century into a serious discipline and explores changing trends in interpretation in recent decades. The authors convey the excitement of archaeology while helping readers to evaluate new discoveries by explaining the methods and theories that lie behind them. In addition to drawing upon examples and case studies from many regions of the world and periods of the past, the book incorporates the authors' own fieldwork, research and teaching. It continues to include key reference and further reading sections to help new readers find their way through the

ever-expanding range of archaeological publications and online sources as well as colour illustrations and boxed topic sections to increase comprehension. Serving as an accessible and lucid textbook, and engaging students with contemporary issues, this book is designed to support students studying Archaeology at an introductory level. New to the sixth edition: Inclusion of the latest survey and imaging techniques, such as the use of drones and eXtended reality. Updated material on developments in dating, DNA analysis, isotopes and population movement, including consideration of the ethical considerations of these techniques. Coverage of new developments in archaeological theory, such as the material turn/ontological turn, and work on issues of equality, diversity and inclusion. A whole new chapter covering archaeology in the present, including new sections on heritage and public archaeology, and an updated consideration of archaeology 's relationship with the climate crisis. A revised glossary with over 200 new additions or updates.
