The remote Ad Astra seminary, located on the Mongolian border, trains dedicated recruits to survive in harsh Lunar or Martian environments, becoming men of holiness and purpose. Here, Tomás Chen-Diaz hopes the strict routine of study, prayer and work will mend his broken heart and offer him a meaningful alternative to the world of back-stabbing intrigue he rejected when he left his family's powerful corporation. Yet living within the sacred confines of a seminary is harder than he expected; soon, he's challenged to learn new skills while navigating both minor jealousies and global politics---all while making friends and maturing as a person. But will his virtues of patience and humility help him when he is ultimately put to the test? Because when he finds himself at the very ends of the earth, he must confront his exiled brother Francisco and force him to face the twisted and deadly

shadows of their shared past...and he may not survive the encounter. This stand-alone entry in the Beyond Cascadia near-future saga is a unique, intense and intimate journey through tangled human relationships, exploring how---and if---remorse and forgiveness can ever be enough to conquer the darkest heart.

Fundamentals of Automotive Technology Harry N Abrams Incorporated Automotive Automatic Transmission and Transaxles, published as part of the CDX Master Automotive Technician Series, provides students with an in-depth introduction to diagnosing, repairing, and rebuilding transmissions of all types. Utilizing a "strategy-based diagnostics" approach, this book helps students master technical trouble-shooting in order to address the problem correctly on the first attempt. -Outcome focused with clear objectives, assessments, and seamless coordination with task sheets -Introduces transmission design and operation, electronic controls, torque converters, gears and shafts, reaction and friction units, and manufacturer types -Equips students with tried-and-true techniques for use with complex shop problems -Combines the latest technology for computer-controlled transmissions with traditional skills for hydraulic transmissions -Filled with pictures and illustrations that aid comprehension, as well as real-world examples that put theory into practice -Offers instructors an intuitive, methodical course structure and helpful support tools With complete coverage of this specialized topic, this book prepares students for MAST certification and the full range of transmission problems they will encounter afterward as a technician. About CDX Master Automotive Technician Series Organized around the principles of outcome-based education, CDX offers a uniquely flexible and in-depth program which aligns learning and assessments into one cohesive and adaptable learning system. Used in conjunction with CDX MAST Online, CDX prepares students for professional success with media-rich integrated solutions. Martha Beckstead just started a new job, but today will be her last day. She

thinks it's because her husband ordered her to quit and stay home with their two young daughters—their fundamentalist religion discourages women working outside the home. What neither of them knows is that today the long-feared Cascadia Subduction Zone earthquake will devastate the entire west coast from Canada to California. Martha will be a hundred miles from home when the bridges fall, the roads buckle, and the mountainsides collapse in a rush of mud and stone. She'll be alone as she survives the harrowing journey through the Oregon wilderness to discover if her family has survived the quake and the massive coastal tsunami. The trek will threaten her life, erode her belief in the god she's always known, and transform her into someone she never expected

A rich and diverse tapestry weaving together the many voices, narratives, skills, and talents of women up and down the coastal Pacific Northwest who devote their lives and careers to the sea. Beckoned by the Sea celebrates coastal women from northern BC to northern California who work on or with the sea. The twenty-four women featured in this inspiring and fascinating book represent a variety of industries—from conservation, commercial fishing, and marine biology to safety and rescue, tourism, and the arts. Weaving together elements of social history, culture, geography, and environmentalism, author Sylvia Taylor draws on in-depth interviews, meticulous research, and her own experience as a deckhand on a commercial fishing boat. Beckoned by the Sea investigates the myriad ways in which women have contributed to the marine industries that sustain the people and shape the culture of North America 's west coast—and reveals how the sea itself has touched the lives of these women by giving them not just a livelihood but an infinite source of inspiration and personal fulfillment.

EPIC Award Winner If you live in the Pacific Northwest, get ready to run for your life . . . In the face of a massive earthquake and tsunami in the Pacific Northwest, a respected geologist must make two gut-wrenching decisions. One could cost him his reputation, the other, his life. Is the Northwest overdue for a huge quake and tsunami, or will the region remain safe for hundreds of years yet to come? No one knows... or does someone? Dr. Rob Elwood, a geologist whose specialty is earthquakes and tsunamis, is having nightmares of "the big one" that are way too real to disregard. His friend, a counselor and retired reverend, does not think Rob is going nuts. To the contrary, he believes the dreams are premonitions to be taken seriously. No one else does, however, even after a press conference. Some live to regret it, most don't. Rob's drama becomes intertwined with others--a retired fighter pilot trying to make amends to a woman he jilted decades ago and a quixotic retiree searching for legendary buried treasure in the rugged coastal mountains of Oregon. All are about to live Rob's nightmare. "Riveting, scary, and entirely believable . . . a compelling, page-turning thriller with the ring of truth." Jerry Thompson, author of *Cascadia's Fault* H. W. "Buzz" Bernard, a native Oregonian born in Eugene and raised in Portland, is a best-selling, award-winning novelist. His debut novel, *Eyewall*, which one reviewer called a "perfect summer beach read," was released in May 2011 and went on to become a number-one best seller in Amazon's Kindle Store. Before becoming a novelist, Buzz worked at The Weather Channel in Atlanta, Georgia, as a senior meteorologist for thirteen years. Prior to that, he served as a weather officer in the U.S. Air Force for over three decades. He attained the rank of colonel and his "airborne" experiences include a mission with the Air Force Reserve Hurricane Hunters, air drops over the Arctic Ocean and Turkey, and a stint as a weather officer aboard a Tactical Air Command airborne command post (C-135).

In the midst of spiraling ecological devastation, multispecies feminist theorist Donna J. Haraway offers provocative new ways to reconfigure our relations to the earth and all its inhabitants. She eschews referring to our current epoch as the Anthropocene, preferring to conceptualize it as what she calls the Chthulucene, as it more aptly and fully describes our epoch as one in which the human and nonhuman are inextricably linked in tentacular practices. The Chthulucene, Haraway explains, requires sym- poiesis, or making-with, rather than auto-poiesis, or self-making. Learning

to stay with the trouble of living and dying together on a damaged earth will prove more conducive to the kind of thinking that would provide the means to building more livable futures. Theoretically and methodologically driven by the signifier SF—string figures, science fact, science fiction, speculative feminism, speculative fabulation, so far—*Staying with the Trouble* further cements Haraway's reputation as one of the most daring and original thinkers of our time.

It is well known that American culture is a dominant force at home and abroad; our exportation of everything from movies to junk food is a well-documented phenomenon. But is it possible America's most troubling impact on the globalizing world has yet to be accounted for? In *Crazy Like Us*, Ethan Watters reveals that the most devastating consequence of the spread of American culture has not been our golden arches or our bomb craters but our bulldozing of the human psyche itself: We are in

the process of homogenizing the way the world goes mad. America has been the world leader in generating new mental health treatments and modern theories of the human psyche. We export our psychopharmaceuticals packaged with the certainty that our biomedical knowledge will relieve the suffering and stigma of mental illness. We categorize disorders, thereby defining mental illness and health, and then parade these seemingly scientific certainties in front of the world. The blowback from these efforts is just now coming to light: It turns out that we have not only been changing the way the world talks about and treats mental illness -- we have been changing the mental illnesses themselves. For millennia, local beliefs in different cultures have shaped the experience of mental illness into endless varieties. Crazy Like Us documents how American interventions have discounted and worked to change those indigenous beliefs, often at a dizzying rate. Over the last decades, mental illnesses popularized in America have been spreading across the globe with the speed of contagious diseases. Watters travels from China to Tanzania to bring home the unsettling conclusion that the virus is us: As we introduce Americanized ways of treating mental illnesses, we are in fact spreading the diseases. In post-tsunami Sri Lanka, Watters reports on the Western trauma counselors who, in their rush to help, inadvertently trampled local expressions of grief, suffering, and healing. In Hong Kong, he retraces the last steps of the teenager whose death sparked an epidemic of the American version of anorexia nervosa. Watters reveals the truth about a multi-million-dollar campaign by one of the world's biggest drug companies to change the Japanese experience of depression -- literally marketing the disease along with the drug. But this book is not just about the damage we've caused in faraway places. Looking at our impact on the psyches of people in other cultures is a gut check, a way of forcing ourselves to take a fresh look at our own beliefs about mental health and healing. When we examine our assumptions from a farther shore, we begin to understand how our own culture constantly shapes and sometimes creates the mental illnesses of our time. By setting aside our role as the world's therapist, we may come to accept that we have as much to learn from other cultures' beliefs about the mind as we have to teach.
