Includes a new Afterword by the author on the 2011 Japan Earthquake, the lessons learned, and the... *Cascadia's Fault: The Coming Earthquake and Tsunami that ...* Cascadia's Fault addresses a probable scenario of a 9.0+ earthquake in the Cascadia Subduction Zone from N. California to Vancouver Island, BC,

followed by a tsunami that could rise as much as a 60 storey building at shoreline Along the entire zone. Cascadia's Fault: The Coming Earthquake and Tsunami that ... [Excerpt from Cascadia's Fault] Bottom line: if you're on a beach and the ground starts shaking—and especially if that shaking lasts more than one minute—it's probably a subduction earthquake and there probably will be a tsunami. The shaking is all the warning you're

going to get. Cascadia's Fault: The Coming Earthquake and Tsunami that ... Cascadia's Fault The Coming Earthquake and Tsunami That Could Devastate North America (Book) : Thompson, Jerry : Explains that a major earthquake and resulting tsunamis are likely to occur off the Pacific Northwest coast any time within the next two hundred years, arguing that the effects of the disaster will be far worse than the damage from the 2004 Sumatran quake and tsunamis. *This Earthquake Drowned the Pacific Northwest*

To the north of the Cascadia Fault, in 1964, a similar type earthquake - a 9.2 magnitude event - hoisted up as much as 200,000 square kilometres of seabed and deformed a land mass roughly the size ...

CASCADIA'S FAULT

Praise for *Cascadia's Fault* "Reporter Jerry Thompson puts the history of subduction earthquakes and the resultant tsunamis into clear perspective. In *Cascadia's Fault: The Coming Earthquake and Tsunami That Could Devastate North America*, Thompson has written a very readable tale of how plate

tectonics and earthquake science works, and what we need to know if we insist on being Left Coasters."

Cascadia's Fault: The Coming Earthquake and Tsunami That

... More than 300 years ago, the Pacific Northwest was rocked by a magnitude 9.0 earthquake. What would happen if a similar earthquake hit the region today? Reso...

* On average,

the southern end of the fault generates an earthquake every 240 years. * The last quake that ripped the entire 800 miles of the fault happened 311 years ago. * Cascadia's Fault is virtually identical to the one in Sumatra that killed 230,000 people.

* When Cascadia rips apart from end-to-end, the quake will be magnitude 9 or higher.

Cascadia's Fault
The Deadly

Earthquake That Will Devastate North America (Book) : Thompson, Jerry : The Cascadia Subduction Zone is a crack in the earth's crust, roughly fifty kilometres offshore, running 1,100 kilometres from northern Vancouver Island to northern California. About every 500 years this fault generates a monster earthquake.
